New York Court of Appeals. Records and Briefs. New York (State)., Threads Jane L. Collins,2009-11-15 Americans have been shocked by media reports of the dismal working conditions in factories that make clothing for U S companies But while well intentioned many of these reports about child labor and sweatshop practices rely on stereotypes of how Third World factories operate ignoring the complex economic dynamics driving the global apparel industry To dispel these misunderstandings Jane L Collins visited two very different apparel firms and their factories in the United States and Mexico Moving from corporate headquarters to factory floors her study traces the diverse ties that link First and Third World workers and managers producers and consumers Collins examines how the transnational economics of the apparel industry allow firms to relocate or subcontract their work anywhere in the world making it much harder for garment workers in the United States or any other country to demand fair pay and humane working conditions Putting a human face on globalization Threads shows not only how international trade affects local communities but also how workers can organize in this new environment to more effectively demand better treatment from their distant corporate employers

Federal Register ,1940 Free Trade & Uneven Development Gary Gereffi,David Spener,Jennifer Bair,2002-08-12 This volume addresses many of the complex issues raised by North American integration through the lens of one of the largest and most global industries in the region textiles and apparel In part this is a story of winners and losers in the globalization process especially if one focuses on jobs lost and jobs gained in different countries and communities within North America defined here as Canada the United States Mexico Central America and the Caribbean However it would be a mistake to view the industry solely in these zerosum terms The North American apparel industry is an excellent illustration of larger trends in the global economy in which regional divisions of labor appear to be one of the most stable and effective responses to globalization The contributors to this volume are an international and interdisciplinary group of scholars who have all done detailed fieldwork at the firm and factory levels in one or more countries of North America Taken together the essays offer theoretical and methodological innovations built around the

intersection of the global commodity chains and industrial districts literatures as well as innovative approaches to studying the impact of cross national interfirm networks in terms of production and trade issues and local development outcomes for workers and communities
