Thompson,1987-10-08 **Apple Iic and Iie Assembly Language** Jules H. Gilder,2012-12-06 The Apple series of computers represents one of the most versatile and powerful home computers available If you ve used your computer for a while you ve probably become quite familiar with Applesoft BASIC That s good because once you know that this book will show you how to graduate from BASIC programming to assembly language programming There are many reasons to program your Apple in assembly language First and foremost is speed Assembly language is about 100 times faster than BASIC If you re thinking of writing games or business programs that do sorting speed is of the essence and assembly language is a must Assembly language programs usually also require less memory Thus you can squeeze more complex programs into a smaller amount of memory Finally assembly language programs offer you a considerable amount of security because they are more difficult to trace and change While assembly language is powerful it doesn t have to be difficult to learn In fact if you can write programs in Applesoft BASIC you re already half way home This book assumes you know BASIC and absolutely nothing about assembly language or machine language Every effort has been made to write in nontechnical language and to set the chapters out in a logical manner introducing new concepts in digestible pieces as and when they are needed rather than devoting whole chapters to specific items **Apple Iie Technical Reference Manual** ,1985 *The Easy Guide to Your Apple II* Joseph Kascmer,1983 **Computer Books and Serials in Print** ,1985 *National Library of Medicine Audiovisuals Catalog* National Library of Medicine (U.S.),1990 **The Latest and Best of TESS** ,1991 Apple Iic User's Guide Lon Poole,1985 Apple II User's Guide Lon Poole,Martin McNiff,Steven Cook,1981 Presenting the apple II How to operate the apple II Programming in basic Advanced basic programming The disk II Graphics and sound Machine language monitor Compedium of basic statements and functions **Art & Graphics on the Apple II/Iie** William H.
