G. Maschner,Christopher Chippindale,2005 The Handbook of Archaeological Methods comprises 37 articles by leading archaeologists on the key methods used by archaeologists in the field in analysis in theory building and in managing cultural resources The book is destined to become the key reference work for archaeologists and their advanced students on contemporary archaeological methods **Computer Applications and Quantitative Methods in Archaeology** John Wilcock,Kris Lockyear,1995 *Computer Applications and Quantitative Methods in Archaeology, 1989* S. P. Q. Rahtz,J. D. Richards,1989 1989 Computer Applications and Quantitative Methods in Archaeology conference held at the University of York from 21st 23rd March p vii **New Techniques for Old Times, CAA 98** Ivan Briz,Juan A. Barceló,Asunción Vila,1999 What has been the impact of computerisation on archaeology and is it a good or bad thing The papers in this volume derive from the 26th conference held in Barcelona in March 1998 Overall papers deal with the advent of new techniques to overcome existing problems in archaeological analysis or data archiving **Archaeology in the Digital Era** Angeliki Chrysanthi,Konstantinos Papadopoulos,Patricia Murrieta-Flores,Timothy Sly,Earl Earl,2025-10-01 CAA is the foremost conference on digital archaeology and this volume offers a comprehensive and up to date reference to the state of the art This volume contains a selection of the best papers presented at the 40th Annual Conference of Computer Applications and Quantitative Methods in Archaeology CAA held in Southampton from 26 to 29 March 2012 The papers all written and peer reviewed by experts in the field of digital archaeology explore a multitude of topics to showcase ground breaking technologies and best practice from various archaeological and informatics disciplines with a variety of case studies from all over the world **Archaeological Method and Theory** Linda Ellis,2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and

the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

Digital Geoarchaeology Christoph Siart, Markus Forbriger, Olaf Bubbenzer, 2017-12-03 This book focusses on new technologies and multi method research designs in the field of modern archaeology which increasingly crosses academic boundaries to investigate past human environmental relationships and to reconstruct palaeolandscapes It aims at establishing the concept of Digital Geoarchaeology as a novel approach of interdisciplinary collaboration situated at the scientific interface between classical studies geosciences and computer sciences Among others the book includes topics such as geographic information systems spatiotemporal analysis remote sensing applications laser scanning digital elevation models geophysical prospecting data fusion and 3D visualisation categorized in four major sections Each section is introduced by a general thematic overview and followed by case studies which vividly illustrate the broad spectrum of potential applications and new research designs Mutual fields of work and common technologies are identified and discussed from different scholarly perspectives By stimulating knowledge transfer and fostering interdisciplinary collaboration Digital Geoarchaeology helps generate valuable synergies and contributes to a better understanding of ancient landscapes along with their forming processes Chapters 1 2 6 8 and 14 are published open access under a CC BY 4 0 license at link.springer.com
