African Problems Are Selfinflicted:

African Problems Are Self-Inflicted Julius I. Ebetaleye, 2003-12 The launch of this book African Problems are Self inflicted the fifth literary work in my collection provides for me yet another momentous occasion to reflect on the dire situation in our beloved continent Africa When the majority of us took the step many years back to venture overseas it was essentially to avoid the significant problems of the times exemplified by social malaise unstable political climate and plummeting macro economic fortunes among others We hoped optimistically that things would soon take a turn for the better Sadly decades later Africa seems to be heading further and faster into the abyss without any reprieve in sight I have chosen to talk on the topic of Leadership crises Africa s Woe during this short introspective introduction Frequently the debate has arisen as to the root cause of Africa s woes Some afrocentric individuals have sought to attribute the continent s suffering to the twin ills of the slave trade and colonialism Going further those belonging to this school of thought reason that the rest of the world particularly Europe owes Africa an apology for starters along with the wholesale eradication of her foreign indebtedness the deserved icing on the cake Then and only then in their eyes will the impetus be provided for Africa to begin to assume her rightful place in the community of world nations Contrary to the above view however I hold a divergent opinion Africa s tragedy to my mind is not a product of the slave trade Neither is there any credence in the lame duck colonialism thesis nor are its problems located in the plague of disease and death besetting its people To my mind Africa s biggest trauma lies in the constant constrictions economic and otherwise placed on the dreams hopes and ambitions that Africans have for themselves The culprits in Africa s malaise are its rulers the most bombastic of the species that history has ever thrown up These miscast actors are adept through their greed at eroding the best of Africa s promise It is at the doorsteps of Africa s rulers that the woes and misfortunes should rightly be consigned Undoubtedly you are surprised that I have deliberately refrained from engaging the verb Leaders in describing African rulers heads of states or presidents as the case may be Leadership after all means inspiring the people towards achieving corporate goals which serve the common good of the larger society African rulers over the years if anything have abused the levers of power in order to abort the continent s dreams and bloody its people As I survey the continent in order to dredge up signposts of remnant promise I am struck again and again by its misbegotten history Everywhere I look there is devastation death destitution and a creeping anarchy Nigeria blithely acclaimed by its misrulers of being a great nation is leading the continent in corruption graft and wastage of oil resources Somalia s warlords have shot their nation into oblivion Sierra Leone has become a mere shell of a nation partly run until recently by a limb hacking mad man called Fraday Sankoh and a collaborative military junta Liberia until a few days ago was groaning under Charles Taylor s jaundiced notion of state craft The two Congo s are in a turmoil of war that continues to escalate defying solution Like many African rulers before him Robert Mugabe has discovered that Zimbabwe is his personal playground available to be wrecked as he wishes Until providence took Jonas Savimbi away he had

staked out Angola as his own territory to rule or destroy Rwanda is haunted still by the ghosts of 800 000 Tutsis murdered in cold blood in one of the 20th century s worst genocide Does it surprise anyone that in most of Africa political power has emerged as the only thriving industry Worse still those who hanker after power do *What is Africa's Problem?* Yoweri Museveni,2000 Recent seismic shifts in Congo and Rwanda have exposed the continued volatility of the state of affairs in central Africa As African states have shaken off their postcolonial despots new leaders with sweeping ideas about a pan African alliance have emerged and yet the internecine struggles go on What is Africa s problem As one of the leaders expressing a broad and forceful vision for Africa s future Uganda s Yoweri K Museveni is perhaps better placed than anyone in the world to address the very question his book poses In 1986 after more than a decade of armed struggle a rebellion led by Museveni toppled the dictatorship of Idi Amin and Museveni at 42 became president of Uganda a country at that time in near total disarray Since then Uganda has made remarkable strides in political civic and economic arenas and Museveni has assumed the role of the eminence grise of the new leadership in central Africa Philip Gourevitch *The New Yorker* As such he has proven a powerful force for change not just in Uganda but across the turbulent span of African states This collection of Museveni s writings and speeches lays out the possibilities for social change in Africa Working with a broad historical understanding and an intimate knowledge of the problems at hand Museveni describes how movements can be formed to foster democracy how class consciousness can transcend tribal differences in the development of democratic institutions and how the politics of identity operate in postcolonial Africa Museveni s own contributions to the overthrow of Zaire s Mobutu Sese Seko and to the political transformation of Uganda suggest the kind of change that may sweep Africa indecades to come What Is Africa s Problem gives a firsthand look at what those changes might be how they might come about and what they might mean

Whirlwind of African Insanity Lawrence N. Zarkpah,2012-10-05 Liberia a small West African nation imploded in a civil war that began on December 24 1989 By the time the war ended fourteen years later more than 250 000 lives had been taken Many people sought refuge in camps throughout West Africa In the war children were trained to become killing machines and women and young girls were held as sex slaves Charles Taylor the main mastermind behind this rebellion was elected President of Liberia in 1997 Liberians thought that his presidency would lead to the end of the civil war but it only extended the war Adding to the pressure Taylor faced accusations of war crimes He relinquished power in August 2003 and was escorted to Nigeria where he was subsequently arrested and taken to the International Criminal Court at The Hague Whirlwind of African Insanity is not just my story It resonates with the countless voices of children who suffer and die in wars about which they know nothing The book also provides some of the reasons why Africa is and may forever remain plagued It presents two arguments about the real causes of Africas disasters and is written on behalf of underprivileged children whose cries for help are drowned in oceans of selfish politics and whose lives are buried in the explosions of wars It is also a story about survival in hellish conditions and optimism when there is nothing about which to be optimistic State

of the Continent John M. Fobanjong, 2018-11-28 What precisely is the state of the African continent today Depending on one's perspective the answer may either dwell on Africa's recent economic and political accomplishments or focus on the long standing single story of failure disaster and eternal dictatorships This book provides a nuanced forceful and balanced assessment of Africa's political and economic performance since independence While acknowledging Africa's tragic pitfalls dating to the transatlantic slave trade and colonialism *State of the Continent* skillfully argues that theories associated with the dependency school are no longer enough to explain the continent's failures in governance and economic performance For a continent so richly blessed and endowed with both human and material resources the blame for Africa's lackluster performance falls squarely on its leadership To get things right Nkrumah's vision of the primacy of the political kingdom must be prioritized whereupon economic gains shall predictably follow In lucid and persuasive prose this volume is an ideal book for scholars as well as students of international studies and African politics *State of the Continent* M.

Nnaemeka, 2005-07-30 Heated debates about and insurgencies against female circumcision are symptoms of a disease emanating from a mindset that produced hierarchies of humans conquered colonies and built empires The loss of colonies and empires does not in any way mitigate the ideological underpinnings of empire building and the knowledge construction that subtends it The mindset finds its articulation at points of coalescence Female circumcision provided a point of coalescence and impetus for this articulation Insisting that the hierarchy on which the imperialist project rests is not bipolar but multi layered and more complex the contributions in this volume demonstrate how imperialist discourses complicate issues of gender race and history Nnaemeka gives voice to the silenced and marginalized and creates space for them to participate in knowledge construction and theory making The authors in this volume trace the travels of imperial and colonial discourses from antecedents in anthropology travel writings and missionary discourse to modern configurations in films literature and popular culture The contributors interrogate foreign or Western modus operandi and interventions in the so

called Third World and show how the resistance they generate can impede development work and undermine the true collaboration and partnership necessary to promote a transnational feminist agenda With great clarity and in simple accessible language the contributors present complex ideas and arguments which hold significant implications for transnational feminism and development

Consensus as Democracy in Africa Matolino, Bernard, 2018-12-28 Some philosophers on the African continent and beyond are convinced that consensus as a polity represents the best chance for Africa to fully democratise In *Consensus as Democracy in Africa* Bernard Matolino challenges the basic assumptions built into consensus as a social and political theory Central to his challenge to the claimed viability of consensus as a democratic system are three major questions Is consensus genuinely superior to its majoritarian counterpart Is consensus itself truly a democratic system Is consensus sufficiently different from the one party system In taking up these issues and others closely associated with them Matolino shows that consensus as a system of democracy encounters several challenges that make its viability highly doubtful Matolino then attempts a combination of an understanding of an authentic mode of democracy with African reality to work out what a more desirable polity would be for the continent

Problems and Challenges for Lawyers in Africa Okechukwu Chinwuba Oko, 2007 This book provides an illuminating perspective on how lawyers operate in a society anxious to embrace democracy in this era of hope and optimism yet still crippled by past attitudes weak and ineffectual institutions corruption and the recrudescence of primordial ethnic sentiments using Nigeria as a case study The book compares and contrasts the central issues faced by lawyers all over the African continent since the social pathologies that disfigure Nigeria are prevalent in most African nations Despite these problems the democratic impulse remains strong in the continent of Africa Nearly all African countries put their faith in constitutional democracy despite its debasement by the political elites increasingly they depend on law to help promote social equilibrium and secure constitutional democracy
