

African Cats

Edward Hamilton

African Cats:

Cats of Africa Luke Hunter, 2013-06-25 There is nowhere on Earth like Africa for observing wild cats. A week spent in the superb national parks and game reserves produces almost guaranteed sightings of the three most spectacular and sought after species: lions, cheetahs, and leopards. Yet alongside the big three, Africa is home to a further seven species of cat, far less conspicuous than their larger cousins. Of these, the caracal, serval, and African wildcat are marginally better known, while few people have seen the remaining four: the black-footed cat, African golden cat, jungle cat, and sand cat. Rarely observed and little understood, most have never been the focus of dedicated scientific research. This book covers all 10 species. Inevitably, the bias is towards the large, well-studied cats, but it includes all that is known about the smaller species, including observations and data from their Asian range or from captivity to fill in some gaps. Chapters deal with evolution and anatomy, predation, social systems, reproduction, and survival, competition and conflict, and conservation, and include the most current research findings from around the continent. Supported by a wealth of dramatic and beautiful images, this is a comprehensive overview of the cat family in Africa, from the famous and popular African parks with their celebrated safari-friendly felids to the few remaining places on the continent uninhabited by people where a wild cat may spend its entire life without feeling the effects of the human presence. Unfortunately, such untrammelled freedom is rare. The challenges facing cats in Africa are profound. Only one, the ubiquitous domestic cat, does not require dedicated conservation activity to ensure its survival for the next century. More than at any time in history, the fate of Africa's wild cats is in our hands. National Geographic Kids Everything Big Cats Elizabeth Carney, 2011 Photographs and easy-to-follow text introduce students to different types of big cats, including tigers, lions, and leopards. **Big Cats** Monica Halpern, 2013-03-01 Learn basic art techniques and interesting facts while drawing big cats. Perfect for illustrated reports. **The African Cats** Geoffrey C. Saigne, 1999 Describes the physical characteristics and behavior patterns of ten types of cats found in Africa. *Transnational Environmental Crime* Rob White, 2017-07-05 The essays selected for this volume illustrate the growing interest in and importance of crime that is both environmental and transnational in nature. The topics covered range from pollution and waste to biodiversity and wildlife crimes, and from the violation of human rights associated with the exploitation of natural resources through to the criminogenic implications of climate change. The collection provides insight into the nature and dynamics of this type of crime and examines in detail who is harmed and what can be done about it. Differential victimisation and contemporary developments in environmental law enforcement are also considered. Collectively, these essays lay the foundations for a criminology that is forward-looking, global in its purview, and that deals with the key environmental issues of the present age. **African Encyclopedia** Oxford University Press, 1974 General knowledge encyclopaedia with particular reference to African culture and development. Covers economic development, agriculture, historical and geographical aspects, the social sciences, health, industry, science, technology, traditions, social and cultural anthropology, the arts, literature, etc. Illustrations.
