African Poor A History:

The African Poor John Iliffe, 1987-12-25 This history of the poor of Sub Saharan Africa begins in the monasteries of thirteenth century Ethiopia and ends in the South African resettlement sites of the 1980s Its thesis derived from histories of poverty in Europe is that most very poor Africans have been individuals incapacitated for labour bereft of support and unable to fend for themselves in a land rich economy There has emerged the distinct poverty of those excluded from access to productive resources Natural disaster brought widespread destitution but as a cause of mass mortality it was almost eliminated in the colonial era to return to those areas where drought has been compounded by administrative breakdown Professor Iliffe investigates what it was like to be poor how the poor sought to help themselves how their counterparts in other continents live The poor live as people rather than merely parading as statistics Famines have alerted the world to African poverty but the problem itself is ancient Its prevailing forms will not be understood until those of earlier periods are revealed and trends of change are identified This is a book for all concerned with the future of Africa as well as for students of poverty elsewhere Encyclopedia of African History 3-Volume Set KEVIN SHILLINGTON., 2005 **A History of African Societies to 1870** Elizabeth Isichei, 1997-04-13 This comprehensive and detailed exploration of the African past from prehistory to approximately 1870 is intended to provide a fully up to date complement to the Cambridge History of Africa Reflecting several emphases in recent scholarship it focusses on the changing modes of production on gender relations and on ecology laying particular stress on viewing history from below A distinctive theme is to be found in its analyses of cognitive history The work falls into three sections The first comprises a historiographic analysis and covers the period from the dawn of prehistory to the end of the Early Iron Age The second and third sections are for the most part organised on regional lines the second section ends in the sixteenth century the third carries the story on to 1870 A second volume now in preparation will cover the period from 1870 to 1995 This book attempts a more rounded view of African history than most of the other textbooks on the subject addressed to a largely undergraduate level student Earlier histories have tended to ignore some of the current foci in the scholarly literature on Africa generally not reflected in the textbooks these include discussions of topical issues like ecology and gender Isichei s book is also more radical Honour in African History John Iliffe, 2005 This is the first published account of the role played by ideas of honour in African history from the fourteenth century to the present day It argues that appreciation of these ideas is essential to an understanding of past and present African behaviour Before European conquest many African men cultivated heroic honour others admired the civic virtues of the patriarchal householder and women honoured one another for industry endurance and devotion to their families These values both conflicted and blended with Islamic and Christian teachings Colonial conquest fragmented heroic cultures but inherited ideas of honour found new expression in regimental loyalty respectability professionalism working class masculinity the changing gender relationships of the colonial order and the nationalist movements which overthrew that order Today the same
