The meaning of South African rock paintings Lenka Tucek, 2003-12-21 Seminar paper from the year 2001 in the subject Art Painting grade 1 A Nelson Mandela Metropolitan University Faculty of Arts course Course South African Archaeology and Ethno history SA 301 language English abstract One aspect of the wealth of material evidence left behind by the early people are the pictures in south african rock art They occur in paintings and engravings In 1996 the total number of sites in South Africa was estimated to be a little over 10 000 but the actual number of sites is significantly undercounted It is still not known exactly when the artists started to make rock art although new techniques of radiocarbon dating using very small samples of paint open the possibility of an absolute chronology The oldest example of rock art in Africa was found in 1969 by Eric Wendt in the southern region of Namibia at a site called Apollo 11 After various datings mainly with the radiocarbon method archaeologists concluded that the rock art tradition in southern africa is at least 27 500 years old In South Africa the oldest dated rock art is an engraving in the Northern Cape which was found on a small slab of dolomite at the Wonderwerk Cave south of Kuruman It has a radiocarbon date of c 10 200 BP Rock paintings are found in the mountainous parts of the subcontinent in abundant rock shelters and shallow overhangs while engravings were generally made on the interior plateau of South Africa There are about 1600 paintings in South Africa In this assignment I will focus on the meaning of rock paintings on the specific symbols and their importance for the early people In Chapter Two I provide a short introduction about the artists and their methods Then I will explain the three important approaches to reveal the meaning of rock art described by Lewis Williams and give some examples of misinterpretations of rock paintings Chapter Three deals with the spiritual world and shamanism in the society of the

Bushmen In the fourth chapter the state of trance and the trance dance are described which are important key parts for understanding rock art Chapter Five shall point out the symbolism of the eland antelope in addition to animal power in general This symbol is of great importance and represented relatively frequent in the art These symbols and the discussion of their meanings seem to be a representative selection to help better understand the spiritual background of south african rock art and its meaning

Visionary Animal Renaud Ego,2019-01-01 An illustrated collection that takes stock of current knowledge and proposes a new way of reading indigenous art For thousands of years nomadic hunter gatherers assigned a fundamental role to the visualization of the animals who shared their lives Some such as the Cape eland the largest of antelopes were the object of a fascinated gaze as though the graceful markings and shapes of their bodies were the key to secret knowledge safeguarded by the animals unsettling silence Renaud Ego posits that the artists sought to steal the animals secret through an act of rendering visible a vitality that remained hidden beneath appearances In this process the San themselves became the visionary animal who possessing the gift of making pictures would acquire far seeing powers Thanks to the singular effectiveness of their visual art they could make intellectual contact with the world in order better to think and ultimately to act They gained access to the full dimension of their human condition through painting scenes that functioned like visual contracts with spiritual and ancestral powers Their art is an act that seeks to preserve the wholeness of existence through a respect for the relationships linking all beings both real and imaginary who partake of it The fundamentally ecological dimension of this message confers on San art its universality and contemporary relevance Visionary Animal is a translation of L Animal voyant published in France in 2015 This rich collection of essays is beautifully illustrated with the author s photographs of rock art from across southern Africa

San Rock Art J.D. Lewis-Williams,2013-02-15 San rock paintings scattered over the range of southern Africa are considered by many to be the very earliest examples of representational art There are as many as 15 000 known rock art sites created over the course of thousands of years up until the nineteenth century There are possibly just as many still awaiting discovery Taking as his starting point the magnificent Linton panel in the Iziko South African Museum in Cape Town J D Lewis Williams examines the artistic and cultural significance of rock art and how this art sheds light on how San image makers conceived their world It also details the European encounter with rock art as well as the contentious European interaction with the artists descendants the contemporary San people

The Archaeology of Rock-Art

Christopher Chippindale, Paul S. C. Taçon, 1998 Pictures painted and carved in caves and on open rock surfaces are amongst our loveliest relics from prehistory This pioneering set of sparkling essays goes beyond guesses as to what the pictures mean instead exploring how we can reliably learn from rock art as a material record of distant times in short rock art as archaeology Sometimes contact period records offer some direct insight about indigenous meaning so we can learn in that informed way More often we have no direct record and instead have to use formal methods to learn from the evidence of the pictures themselves The book's eighteen papers range wide in space and time from the Palaeolithic of Europe to nineteenth century Australia Using varied approaches within the consistent framework of informed and proven methods they make key advances in using the striking and reticent evidence of rock art to archaeological benefit

The Oxford Handbook of African Archaeology Peter Mitchell, Paul Lane, 2013-07-04 Africa has the longest and arguably the most diverse archaeological record of any of the continents It is where the human lineage first evolved and from where Homo sapiens spread across the rest of the world Later it witnessed novel experiments in food production and unique trajectories to urbanism and the organisation of large communities that were not always structured along strictly hierarchical lines Millennia of engagement with societies in other parts of the world confirm Africa's active participation in the construction of the modern world while the richness of its history ethnography and

linguistics provide unusually powerful opportunities for constructing interdisciplinary narratives of Africa's past. This Handbook provides a comprehensive and up-to-date synthesis of African archaeology covering the entirety of the continent's past from the beginnings of human evolution to the archaeological legacy of European colonialism. As well as covering almost all periods and regions of the continent, it includes a mixture of key methodological and theoretical issues and debates and situates the subject's contemporary practice within the discipline's history and the infrastructural challenges now facing its practitioners. Bringing together essays on all these themes from over seventy contributors, many of them living and working in Africa, it offers a highly accessible contemporary account of the subject for use by scholars and students of not only archaeology but also history, anthropology and other disciplines.

Rock Art Studies - News of the World Natalie R. Franklin, Matthias Strecker, 2008-08-05. This is the third in the five-yearly series of surveys of what is happening in rock art studies around the world. As always, the texts reflect something of the great differences in approach and emphasis that exist in different regions. The volume presents examples from Europe, Asia, Africa and the New World. During the period in question, 1999 to 2004, there have been few major events, although in the field of Pleistocene art many new discoveries have been made and a new country added to the select list of those with Ice Age cave art. Some regions, such as North Africa and the former USSR, have seen a tremendous amount of activity, focusing not only on recording but also on chronology and the conservation of sites. With the global increase of tourism, the management of rock art sites that are accessible to the public is a theme of ever-growing importance.

This book explores a suite of spatially close San Bushmen rock painting sites in the Maclear District of South Africa's Eastern Cape Province. As a suite, the sites are remarkable because, despite their proximity to each other, they share patterns of similarity and simultaneous difference.

A Cosmos in Stone David J. Lewis-Williams, 2002-04-16. J. David Lewis-Williams is world-renowned for his work on the rock art of Southern Africa. In this volume, Lewis-Williams describes the key steps in his evolving journey to understand these images painted on stone. He describes the development of technical methods of interpreting rock paintings of the 1970s, shows how a growing understanding of San mythology, cosmology, and ethnography helped decode the complex paintings, and traces the development of neuropsychological models for understanding the relationship between belief systems and rock art. The author then applies his theories to the famous rock paintings of prehistoric Western Europe in an attempt to develop a comprehensive theory of rock art. For students of rock art, archaeology, ethnography, comparative religion, and art history, Lewis-Williams' book will be a provocative read and an
