African Societies In Southern Africa:

African Societies in Southern Africa Leonard Monteath Thompson, 1972-01-01 *South Africa in World History* Iris Berger, 2009-03-27 This volume begins in the early centuries of the Common Era with the various groups of people who had settled in southern Africa Stone Age foragers farmers with iron technology and pastoralists all interacted to create a complex society before Europeans arrived In the seventeenth century Dutch settlers developed a colonial society based on the menial labor of indigenous inhabitants of the Cape and slaves imported from the East Indies and other parts of Africa British conquest in the early nineteenth century brought an end to slavery as well as new forms of colonial domination tension between the British and the original Dutch settlers armed struggle between expanding European communities and Africans including the highly militarized Zulu kingdom and intensive missionary activity that transformed many African societies The discovery of diamonds and gold in the late nineteenth century brought industrialization based on migrant labor new clashes between British and Africaaners the final conquest of African societies and new European migrants During the twentieth century despite further economic development African communities were increasingly impoverished New forms of racial domination lead to the implementation of apartheid in 1948 and heightened political organizing among both African and Africaaner nationalists The intensification of resistance in the 1970s and 80s coupled with drastic changes in the international balance of power brought an end to the apartheid state in 1994 and an intensified struggle to overcome apartheid s economic and political legacy by building a new nonracial society The book emphasizes social and cultural history focusing on people s interactions and identities according to race class gender religion and ethnicity It also addresses changes in literature both oral and written music and the arts and draws on the extensive biographical and autobiographical literature to provide a personal focus for the discussion of major themes While this emphasis reflects dominant trends in historical scholarship for the past two decades it also includes recent material on environmental history and relationships between African Americans and South Africans Where relevant it highlights comparisons between South African and U S history

the narrative **Rethinking White Societies in Southern Africa** Duncan Money, Danelle van Zyl-Hermann, 2020-02-12 This book showcases new research by emerging and established scholars on white workers and the white poor in Southern Africa Rethinking White Societies in Southern Africa challenges the geographical and chronological limitations of existing scholarship by presenting case studies from Angola Mozambique South Africa Zambia and Zimbabwe that track the fortunes of nonhegemonic whites during the era of white minority rule Arguing against prevalent understandings of white society as uniformly wealthy or culturally homogeneous during this period it demonstrates that social class remained a salient element throughout the twentieth century how Southern Africa s white societies were often divided and riven with tension and how the resulting social political and economic complexities animated white minority regimes in the region Addressing themes such as the class based disruption of racial norms and practices state surveillance and interventions and their failures towards nonhegemonic whites and the opportunities and limitations of physical and social mobility the book mounts a forceful argument for the regional consideration of white societies in this historical context Centrally it extends the path breaking insights emanating from scholarship on racialized class identities from North America to the African context to argue that race and class cannot be considered independently in Southern Africa This book will be of interest to scholars and students of southern African studies African history and the history of race *The Shaping of South African Society, 1652-1840.* Richard Elphick, Hermann Giliomee, 2014-01-15 History is a powerful aid to the understanding of the present and those who are concerned with the escalating crisis in South Africa will find this an invaluable source book This is the story of the evolution of a society in which race became the dominant characteristic the primary determinant of status wealth and power Cultural chauvinism of the first European colonists primarily the Dutch merged with economic and demographic developments to create a society in which whites relegated all blacks free blacks Africans imported slaves to a systematic pattern of subordination and oppression that foreshadowed the apartheid of the twentieth century From the beginning of the nineteenth century the new empire builders the British reinforced the racial order In the next century and a half the industrialized South Africa would become firmly integrated into the world economy Published originally in South Africa in 1979 and updated and expanded now a decade later this book by twelve South African British Canadian Dutch and American scholars is the most comprehensive history of the early years of that troubled nation The authors put South Africa in the comparative context of other colonial systems Their social political and economic history is rich with empirical data and rests on a solid base of archival research The story they tell is a complex drama of a racial structure that has resisted hostile impulses from without and rebellion from within [Space Fostering African Societies](#) Annette Froehlich, 2022-01-01 This peer reviewed book provides detailed insights into how space and its applications are and can be used to support the development of the full range and diversity of African societies as encapsulated in the African Union s Agenda 2063 Following on from Part 1 and 2 which were highly acclaimed by the space community it focuses on the role of space in

supporting the UN Sustainable Development Goals in Africa but covers an even more extensive array of relevant and timely topics addressing all facets of African development It demonstrates that while there have been significant achievements in recent years in terms of economic and social development which have lifted many of Africa s people out of poverty there is still a great deal that needs to be done to fulfill the basic needs of Africa s citizens and afford them the dignity they deserve To this end space is already being employed in diverse fields of human endeavor to serve Africa s goals for its future but there is much room for further incorporation of space systems and data Providing a comprehensive overview of the role space is playing in helping Africa achieve its developmental aspirations the book will appeal to both students and professionals in fields such as space studies international relations governance and social and rural development
