African Students In Alien Cultures:

African students in alien cultures Amechi Anumonye,1967 **Black Skin, White Coats** Matthew M. Heaton,2013-10-15

Black Skin White Coats is a history of psychiatry in Nigeria from the 1950s to the 1980s Working in the contexts of decolonization and anticolonial nationalism Nigerian psychiatrists sought to replace racist colonial psychiatric theories about the psychological inferiority of Africans with a universal and egalitarian model focusing on broad psychological similarities across cultural and racial boundaries Particular emphasis is placed on Dr T Adeoye Lambo the first indigenous Nigerian to earn a specialty degree in psychiatry in the United Kingdom in 1954 Lambo returned to Nigeria to become the medical superintendent of the newly founded Aro Mental Hospital in Abeokuta Nigeria s first modern mental hospital At Aro Lambo began to revolutionize psychiatric research and clinical practice in Nigeria working to integrate modern western medical theory and technologies with traditional cultural understandings of mental illness Lambo s research focused on deracializing psychiatric thinking and redefining mental illness in terms of a model of universal human similarities that crossed racial and cultural divides Black Skin White Coats is the first work to focus primarily on black Africans as producers of psychiatric knowledge and as definers of mental illness in their own right By examining the ways that Nigerian psychiatrists worked to integrate their psychiatric training with their indigenous backgrounds and cultural and civic nationalisms Black Skin White Coats provides a foil to Frantz Fanon s widely publicized reactionary articulations of the relationship between colonialism and psychiatry Black Skin White Coats is also on the cutting edge of histories of psychiatry that are increasingly drawing connections between local and national developments in late colonial and postcolonial settings and international scientific networks Heaton argues that Nigerian psychiatrists were intimately aware of the need to engage in international discourses as part and parcel of the transformation of psychiatry at home

Might it be possible that the world is being migrated into an era where the imperial periphery will be increasingly governed through Artificial Intelligence AI and robotics designed to replace human beings Celebrated as efficient strong unfailing tireless precise and beyond corruption AI and robots are set to replace African leaders who are imperially deemed to be and consistently condemned as corrupt failed weak and inefficient But if these AI and robots are neo imperial tools and machinations the million dollar question is whether empire is not returning to recolonise the supposedly inefficient Africans via the new technologies and machinism Where Africans once celebrated their liberation war movements empire has emplaced what it calls liberation technologies designed to supposedly liberate African youths from their own states and governments led by liberation movements Where Africans once celebrated their liberation

war movements empire has placed its own NGOs CSOs spewing liberal ideologies designed to ostensibly liberate African youths from their own supposedly failed and corrupt states and government leaders With African youths citizens allying not with their liberation movements but with the liberation technologies and liberal NGOs CSOs it is not surprising why African citizens oppose their states led Fast Track Land Redistribution Programmes while ironically they happily celebrate Fast Tracked COVID 19 Vaccines Posing the notion of HumansMustFall movements this book underscores ways in which empire is in a process of eternal return to 21st century Africa The book is crucial for scholars and activists in political science government studies sociology anthropology cultural studies history languages and communication studies security studies military studies and development studies
