African Traditional Architecture An Historical And Geographical Perspective:

African Traditional Architecture Susan Denyer,1978 **African traditional architecture** ,1976 **Tradition, Culture and Development in Africa** Ambe J Njoh,2016-12-05 The fact that Africa continues to lag behind all regions of the world on every indicator of development is hardly contentious However there is fierce debate on why this should be the case despite national and international efforts to reverse this situation While this book does not attempt to answer this question per se it addresses a largely ignored but important issue which might provide some insights into the matter This issue is the link between culture tradition and socio economic development in Africa By weaving a common thread through these concepts this book breaks new ground in the discourse on development It highlights the differences between Euro centric culture which is rooted in capitalist ideology and Protestant ethic and traditional African culture where concepts such as capital accumulation entrepreneurial attitudes and material wealth are not of top priority In doing so it dispels popular myths stereotypes and distortions as well as discounting misleading accounts about major aspects of African culture and traditional practices **Architecture and Power in Africa** Nnamdi Elleh,2002-12-30 Two of the most ambitious religious edifices of the 20th century are the Our Lady of Peace Basilica in the West African country of the Ivory Coast and the Hassan II Mosque in Morocco Nnamdi Elleh not only provides a substantial architectural and pictorial analysis of the buildings themselves Using these two buildings as case studies he also investigates questions of national memory urban form architectural styles concepts of democracy social hierarchies as well as the elites who make the decisions to build Africa s post independence monuments and capital cities His book is an exciting synthesis of theoretical and empirical analysis that is bound to stimulate debate about the form and content of post colonial identities in Africa **African Traditional Architecture : Anhistorical and Geographical Perspective** S. Denyer, Routledge Handbook of Islam in Africa Terje Østebø,2021-12-20 Bringing together cutting edge research from a range of disciplines this handbook argues that despite often being overlooked or treated as marginal the study of Islam from an African context is integral to the broader Muslim world Challenging the portrayal of African Muslims as passive recipients of religious impetuses arriving from the outside this book shows how the continent has been a site for the development of rich Islamic scholarship and religious discourses Over the course of the book the contributors reflect on The history and infrastructure of Islam in Africa Politics and Islamic reform Gender youth and everyday life for African Muslims New technologies media and popular culture Written by leading scholars in the field the contributions examine the connections between Islam and broader sociopolitical developments across the continent demonstrating the important role of religion in the everyday lives of Africans This book is an important and timely contribution to a subject that is often diffusely studied and will be of interest to researchers across religious studies African studies politics and sociology Prison Architecture and Punishment in Colonial Senegal Dior Konaté,2018-10-15 For the past four decades a rich scholarship has investigated the emergence of the prison in Europe and North America mainly the

connection between institutional architecture techniques of social control and mechanisms of discipline Prison Architecture and Punishment in Colonial Senegal asks if these connections did exist in colonial Senegal since prisons in Africa had never been the focus of such scholarship This book addresses three main themes First it analyzes prison buildings and their changing architectural forms throughout the colonial period to highlight how the French used prison architecture to control Africans Second it describes the connections between the internal layout of prison spaces and punishment to show how the design of prisons expressed the notions of punishment and reforms The book also undertakes a critical assessment of inmates agency in reshaping the world of prisons in colonial Senegal Finally it discusses the legacy of colonial prisons in independent Senegal By providing a comprehensive history of prison architecture in Senegal the book helps insert Africa into a more global history by offering a uniquely comparative study of colonialism architecture and punishment
