Africa's Persistent Vulnerable Link To Global Politics:

Africa's Persistent Vulnerable Link to Global Politics Opoku Agyeman, 2001 A key dimension of global politics is the interaction that takes place between the nation states as primary actors and the systemic environment within which the actors operate How a nation state relates to the structural realities of the international system depends very much on its relative strength or weakness within the global system Linkage vulnerability implies that the actors caught in it tend to be severely handicapped in their interactions with the world system that they tend to have little or no say in configuring the underlying linkages By any yardstick Black Africa's relationship to the global system provides the quintessential depiction of linkage vulnerability The book which covers the period from the 1960s to the 1990s portrays the persistence of Africa's vulnerability to global politics across such evocative African places as the Congo Zaire Angola Mozambique and South Africa and it encompasses such issues as the lack of tenaciousness of spiritual dignificatory values the tenuous commitment to the solutions inherent in Pan Africanist ideology and strategies the institutional vacuum engendered by praetorianism the racism of a near hegemonic Western power toward Africa and Western imperialistic terrorism against Africa **Africa's**

Persistent Vulnerable Link to Global Politics Opoku Agyeman, 1997 **Liberal Democracy and Its Critics in Africa** Tukumbi Lumumba-Kasonga, 2013-07-04 Democratic institutional forms and processes are increasingly widespread in Africa as dictatorial regimes have been forced to give way as a result of popular mobilization and external donor pressure However the premises of the African scholars whose empirical research and analytical explorations are included in this volume are that democratic form and democratic substance are two different things Western derived institutional forms are neither necessarily the most appropriate nor the most practical in the current African context and rooting democratic norms in the political cultures of African polities raises socio cultural issues with which political scientists must engage This book explores various critical questions in the context of particular elections and particular countries as diverse as Ghana Nigeria Kenya the Congo Cameroon and the Central African Republic They include the continuing impact of police state apparatuses following democratic transition factors influencing African voters attitudes and behaviour the impact of incumbency on electoral competition women's electoral participation the phenomenon of often very limited party programmatic choice in the context of huge social diversity and multi party competition and the controversial issues around the transplantation of liberal democratic institutions Underlying these issues is the fundamental question of whether democratic processes as currently practised in Africa are really making any significant difference to the African struggle for economic social and cultural progress This volume is valuable for the original perspectives of its African contributors the issues it explores and the concrete democratic experiences it analyses and the challenges it makes to the existing concepts paradigms and practices of liberal democracy **Imagining the United States of Africa** E. Ike Udogu, 2015-02-10 This book frames the debates around the pressing desire for some form of unification that found expression in the pan Africanist movement and formation

of the Organization of African Unity in Addis Ababa Ethiopia in 1963 following the advent of home rule for many former colonies of the Western powers Discussions in this volume address the following fundamental issues nationalism and political integration and how the contradictions between both philosophies can be resolved the amelioration of corruption in order to attract internal and external investments critical for developing the vast natural resources housed in the continent the need for Africa s adaptation to the ideology and practice of capitalism and liberal globalization to suit the character of African states in a projected federal United States of Africa solutions to ethnic conflicts that are bound to happen over clashes of competing group interests the indispensability and promotion of information communication technologies and urgent need to strengthen a network of regional electric power grids that would provide constant energy to the Union and lead to improvement in communication and economic growth and recommendation of social democracy as the genre of democracy suitable for a proposed United States of Africa

Knowledge and Change in African Universities Michael Cross, amasandofirepi, 2017-01-28 While African universities retain their core function as primary institutions for advancement of knowledge they have undergone fundamental changes in this regard These changes have been triggered by a multiplicity of factors including the need to address past economic and social imbalances higher education expansion alongside demographic and economic growth concerns and student throughput and success with the realization that greater participation has not meant greater equity Constraining these changes is largely the failure to recognize the encroachment of the profit motive into the academy or a shift from a public good knowledge learning regime to a neo liberal knowledge learning regime Neo liberalism with its emphasis on the economic and market function of the university rather than the social function is increasingly destabilizing higher education particularly in the domain of knowledge making it increasingly unresponsive to local social and cultural needs Corporate organizational practices commodification and commercialization of knowledge dictated by market ethics dominate university practices in Africa with negative impact on professional values norms and beliefs Under such circumstances African humanist progressive virtues e g social solidarity compassion positive human relations and citizenship democratic principles equity and social justice and the commitment to decolonization ideals guided by altruism and common good are under serious threat The book goes a long way in unraveling how African universities can respond to these challenges at the levels of institutional management academic scholarship the structure of knowledge production and distribution institutional culture policy and curriculum

Who and What Govern in the World of the States? Tukumbi Lumumba-Kasongo, 2005-10-18 This pedagogical study makes a theoretical contribution toward further understanding of the

concepts of power ideology governance the roles and rights of citizens democracy constitutions the corporate foundation of the state and the nature of the dynamic relationship among the states It looks specifically at developing countries and the industrial world giving serious comparative thought to historical sociological and political concerns Significantly the three actors central to the study the state its citizens and private corporations are consistently at odds The conflicting relationship between the three is characterized by the struggle for self interest self preservation and consensus which varies based on the nature of the nation state and its geopolitical location *Research Review* ,2004 [Battlecries of Survival](#) ACTIONAID-Uganda (Organization),2012 [International Affairs](#) ,1991 **The Writers Directory** ,2013 **Journal of Comparative Education and International Relations in Africa** ,1998 *World Agricultural Economics and Rural Sociology Abstracts* ,1996 *Globalisation* Samit Kar,2002 Contributed articles [Globalisation One World, Many Voices](#) Samit Kar,2005 Globalisation has been an important social phenomenon in the contemporary world order The world has become in important respects a single social system as a result of which now virtually affects everyone The global system is not just an environment within which particular societies develop and change The social political and economic connections which crosscut borders between countries decisively condition the fate of those living within each of them But the central question remains Is this interdependence of world society really real or tilted in favour of the richer nations This book presenting a collection of papers touches this central question with a variety of approaches and perspectives Apart from the rich theoretical debate often turning into polemic with regard to globalisation empirical studies show a clear hiatus in the prevailing world order in the aftermath of globalisation under the aegis of richer nations of the North The essays covering a wide range of issues will interest academics and practitioners concerned with the rapidly growing field of globalisation studies **Global Political Economy** Theodore H. Cohn,2003 This text emphasizes regional as well as global relations It covers topics such as dollarization the problem of less developed countries foreign debt multinational corporations and the role of economic organizations A historical examination is also included **The Uneasy Relationship** James Barber,1983 *International Politics in Southern Africa* Gwendolen Margaret Carter,Patrick O'Meara,1982
