After Harm:

After Harm Nancy Berlinger, 2007-10-22 Medical error is a leading problem of health care in the United States Each year more patients die as a result of medical mistakes than are killed by motor vehicle accidents breast cancer or AIDS While most government and regulatory efforts are directed toward reducing and preventing errors the actions that should follow the injury or death of a patient are still hotly debated According to Nancy Berlinger conversations on patient safety are missing several important components religious voices traditions and models In *After Harm* Berlinger draws on sources in theology ethics religion and culture to create a practical and comprehensive approach to addressing the needs of patients families and clinicians affected by medical error She emphasizes the importance of acknowledging fallibility telling the truth confronting feelings of guilt and shame and providing just compensation *After Harm* adds important human dimensions to an issue that has profound consequences for patients and health care providers

Pritchard, 1996 The public outcry for a return to moral education in our schools has raised more dust than it has dispelled Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church

and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education *British Medical Journal* ,1916 *Automotive Industries* ,1913 Vols for 1919 include an Annual statistical issue title varies **American Machinist** ,1920 *Lawyers' Reports Annotated* ,1906 *Judicial and Statutory Definitions of Words and Phrases* ,1928 **The Sorceress** Mrs. Oliphant (Margaret),1893 **Transactions of the Highland and Agricultural Society of Scotland** Royal Highland and Agricultural Society of Scotland,1915 **California.
