After The Battle Volume 1:

After the Battle Sky Books Press, Limited, **A History of the Laws of War: Volume 1** Alexander Gillespie, 2011-09-06

This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant It has rarely been a question of numbers It has been and remains one of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

Lerg, Johan Östling, Jana Weiß, Anne Kwaschik, Claudia Roesch, 2024-10-21 The third issue of the yearbook History of Intellectual Culture HIC devotes a thematic section to experimental spaces for knowledge production The articles in this section investigate the role of experimental environments as sites for knowledge production during the long nineteenth century thereby extending the scope beyond the confines of traditional academic institutions such as academies laboratories and universities By focusing on intentional communities colonial gardens agricultural colonies and artistic colonies as experimental spaces the authors investigate the intertwined social natural and aesthetic aspects of environments An overarching aim is to develop a distinct perspective rooted in the history of knowledge wherein experiments are conceptualized both as a category employed by the historical actors and as a methodological concept In addition the third issue comprises several individual papers covering a wide range of topics stretching from the U S patent system in the 1930s and anti intellectualism in interwar Britain to the cultural translation of knowledge in the wake of the Holocaust and the circulation of economic knowledge in postwar Sweden The issue also contains several theoretical historiographical and methodological interventions and reflections including a conversation on decolonizing knowledge in academia and beyond *The Ardennes, 1944-1945* Christer Bergström, 2014-12-19 A comprehensive photo filled account of the six week long Battle of the Bulge when panzers slipped through the forest and took the Allies by surprise In December 1944 just as World War II appeared to be winding down Hitler shocked the world with a powerful German counteroffensive that cracked the center of the American front The attack came through the Ardennes the hilly and forested area in eastern Belgium and Luxembourg that the Allies had considered a quiet sector Instead for the second time in the war the Germans used it as a stealthy avenue of approach for their panzers Much of US First Army was

overrun and thousands of prisoners were taken as the Germans forged a fifty mile bulge into the Allied front But in one small town Bastogne American paratroopers together with remnants of tank units offered dogged resistance Meanwhile the rest of Eisenhower s broad front strategy came to a halt as Patton from the south and Hodges from the north converged on the enemy incursion Yet it would take an epic six week long winter battle the bloodiest in the history of the US Army before the Germans were finally pushed back Christer Bergstr m has interviewed veterans gone through huge amounts of archive material and performed on the spot research in the area The result is a large amount of previously unpublished material and new findings including reevaluations of tank and personnel casualties and the most accurate picture yet of what really transpired from the perspectives of both sides With nearly four hundred photos numerous maps and thirty two superb color profiles of combat vehicles and aircraft it provides perhaps the most comprehensive look at the battle yet published
