## **After The First Three Minutes:**

*The Last Three Minutes* Paul Davies, 2008-08-05 Ragnarok Armageddon Doomsday Since the dawn of time man has wondered how the world would end In *The Last Three Minutes* Paul Davies reveals the latest theories It might end in a whimper slowly scattering into the infinite void Then again it might be yanked back by its own gravity and end in a catastrophic Big Crunch There are other more frightening possibilities We may be seconds away from doom at this very moment Written in clear language that makes the cutting edge science of quarks neutrinos wormholes and multiverses accessible to the layman *The Last Three Minutes* treats readers to a wide range of conjectures about the ultimate fate of the universe Along the way it takes the occasional divergent path to discuss some slightly less cataclysmic topics such as galactic colonization what would happen if the Earth were struck by the comet Swift Tuttle a distinct possibility the effects of falling in a black hole and how to create a baby universe Wonderfully morbid to the core this is one of the most original science books to come along in years Statutory Instruments Great Britain, 1958 **After the First Three Minutes**, 2008

Padmanabhan, 1998-02-05 The evolution of our Universe and the formation of stars and galaxies are mysteries that have long puzzled scientists Recent years have brought new scientific understanding of these profound and fundamental issues In lively prose Professor Padmanabhan paints a picture of contemporary cosmology for the general reader Unlike other popular books on cosmology *After the First Three Minutes* does not gloss over details or shy away from explaining the underlying concepts Instead with a lucid and informal style the author introduces all the relevant background and then carefully pieces together an engaging story of the evolution of our Universe Padmanabhan leaves the reader with a state of the art picture of scientists current understanding in cosmology and a keen taste of the excitement of this fast moving science Throughout no mathematics is used and all technical jargon is clearly introduced and reinforced in a handy glossary at the end of the book For general readers who want to come to grips with what we really do and don't know about our Universe this book provides an exciting and uncompromising read Thanu Padmanabhan is a Professor at Inter University Centre for Astronomy and Astrophysics in Pune India He is the recipient of numerous awards and author of three books *Structure Formation in the Universe* Cambridge 1994 *Cosmology and Astrophysics Through Problems* Cambridge 1996 and together with J V Narlikar *Gravity Gauge Theories and Quantum Cosmology* He is also the author of more than one hundred popular science articles a comic strip serial and several regular columns on astronomy recreational mathematics and the history of science **A Study of the Influence of the Factor of Similarity of Interpolated Material to Original Learning Material on Retroactive Inhibition** Thelma Agnes
