Against Mechanism Why Economics Needs Protection From Science:

Humanism Challenges Materialism in Economics and Economic History Roderick Floud, Santhi Hejeebu, David Mitch, 2017-01-23 Most of the existing research on economic history relies either solely or ultimately on calculations of material interest to explain the major events of the modern world However care must be taken not to rely too heavily on materialism with its associated confidence in perfectly rational actors that simply do not exist What is needed for a more cogent understanding of the long history of capitalist growth is a more realistic human centered approach that can take account of the role of nonmaterial values and beliefs an approach convincingly articulated by Deirdre McCloskey in her landmark trilogy of books on the moral and ethical basis of modern economic life With *Humanism Challenges Materialism in Economics and Economic History* Roderick Floud Santhi Hejeebu and David Mitch have brought together a distinguished group of scholars in economics economic history political science philosophy gender studies and communications who synthesize and build on McCloskey's work The essays in this volume illustrate the ways in which the humanistic approach to economics that McCloskey pioneered can open up new vistas for the study of economic history and cultivate rich synergies with a wide range of disciplines The contributors show how values and beliefs become embedded in the language of economics and shape economic outcomes Chapters on methodology are accompanied by case studies discussing particular episodes in economic history *The Effortless Economy of Science?* Philip Mirowski, 2004 A compilation of essays by the author that reveals the value for science studies of examples arising within the history of economics **The Great Delusion** Steven Stoll, 2009-09 Economic geography **Stabilizing Dynamics** E. Roy Weintraub, 1991-04-26 This work is concerned with the ways in which the talk of the 1930s evolved into technical analysis of some mathematical structures It describes the context for the history of that change and shows how the history of modern economics can be seen as a confluence of several disparate traditions **Economics, Philosophy, and Physics** Ching-Yao Hsieh, Meng-Hua Ye, 1991 Cover Half Title Title Copyright Dedication Contents List of Figures Acknowledgments Introduction The Classical Greek World View Philosophy Science Economics The World View of Saint Thomas Aquinas St Thomas's Philosophy The Scholastic Approach to Science St Thomas's Economics The Disintegration of the Medieval World View Chapter 1 Newtonian Physics Philosophy and Economics Newton's Grand Synthesis Newton's Influence on the Enlightenment The Newtonian Heritage of Contemporary Economics Reductionism Linearity Evolutionary Economics: v. 1 Marc R. Tool, 2019-07-12 The contributors to this volume focus on the political and value issues that in their shared view underlie the global environmental crisis facing us today They argue that only by transforming our dominant values social institutions and way of living can we avoid ecological disaster *Cowboy Politics* John S. Nelson, 2017-11-01 The politics of popular westerns are surprising in substance and significance especially of late Cowboy Politics shows how westerns in literature cinema and television face the challenges of Western Civilization even more than the perils of American frontiers Its strategy is to compare key westerns with major theories of

modern and postmodern politics So it analyzes novels from Owen Wister to Zane Grey and Larry McMurtry It focuses on films from the western revival beginning in the 1990s and featuring Clint Eastwood's *Unforgiven* while its interest in TV stretches from singing cowboys and *Gunsmoke* to David Milch's *Deadwood* Critics are apt to find in westerns the modern politics of Thomas Hobbes and John Locke They tap devices of individuality rationality contract sovereign enforcement and representation to overcome the chaotic violence of a wild zone *Cowboy Politics* examines how westerns often find such measures insufficient to tame the West as a culture of honor and anger that deteriorates into feudal vengeance Instead westerns see the West as the sunset land that is already growing old and moving on So westerns seek fresh starts informed by comparing civilizations more than demonizing savages Westerns worry that modern politics devolve into exploitation oppression spectacle and terror So they pursue supplements in such postmodern politics as republicanism perfectionism populism feminism and environmentalism Especially westerns explore politics of persuasive speech in action in public doing beauty and self reliance in the modes of Hannah Arendt and Ralph Waldo Emerson The first two chapters of *Cowboy Politics* explain how westerns do political theory for popular audiences by making many of our myths the symbolic stories of individuals and communities which we live daily The next three chapters trace the initially modern theories of government in many westerns Then western turns to republican honor rhetoric response ability and character tracking occupy the following four chapters And these set the stage for another four chapters on western attention to postmodern terror mythmaking celebrity spectacle and forgiveness The final two chapters analyze how late satirical and transformative westerns develop realist defenses for their surprisingly postmodern politics
