Against The Stream Critical Essays On Economics:

Against the Stream Gunnar Myrdal, 1974 **The Methodology of Economic Thought** Marc Reed Tool, Warren J. Samuels, 1989-01-01 This collection of articles taken from the Journal of Economic Issues offers both a fresh perspective and a persuasive diagnosis on economic methodology It simultaneously presents institutional economists approaches to economic inquiry and policy as well as a running critique of conceptual flaw and inadequacies of the traditional orthodox neoclassical approach that dominates college curriculums and media **Theology and Economic Ethics** Sean Doherty, 2014-03-27 In the wake of the economic crisis few questions are more pressing than those around the ethics of finance and economics Theology and Economic Ethics seeks to expand the self critical resources of contemporary theological economic ethics by bringing the method of a pre modern thinker Martin Luther 1483 1546 into interaction with that of a modern contribution to social ethics the Swiss theologian Arthur Rich 1910 92 The work is undertaken through a close engagement with a selected publication of Luther his 1519 20 Gro er Sermon von dem Wucher and of Rich his masterwork Wirtschaftsethik published in two volumes in 1984 and 1990 respectively It is the first substantial treatment in English of Rich s magnum opus Sean Doherty introduces Luther s sermon on usury situates it in its context then provides a commentary on this work discussing how Luther brings key theological motifs to bear on a particular economic question The study proceeds with a sketch of Arthur Rich s life and work and presents Rich s method as set out in Wirtschaftsethik Doherty illuminates Rich s understanding of ethics his approach to Scripture and his adoption of the thought of Max Weber and John Rawls Bringing insights from the study of Luther to bear in an analysis of Rich s method Doherty questions some of Rich s assumptions and notes ways in which a more self critical approach could have made his project more successful Finally the book makes tentative suggestions as to the wider applicability of these findings for a Christian approach to economic ethics *The Programming Approach and the Demise of Economics* Franco Archibugi, 2019-11-20 In this book the first of three volumes Franco Archibugi sets out to create an epistemology of economics arguing for a radical overturning of the conventional analysis from a positive approach to a programming approach This overturning leads to a reappraisal of the foundations of Economics itself and to an improved integration of Economics as an autonomous discipline alongside Sociology Political Science Operational Research Social Engineering and Physical or Spatial Planning The author interrogates how scientific the social sciences really are before proposing a new scientific paradigm for the social sciences a political preference function and a general programming approach The chapters revisit hitherto neglected economists like Gunnar Myrdal Ragnar Frisch Vassili Leontief and Leif Johansen using their theory to overturn the epistemological approach of the entire science of economics Volume II explores oppositions to the traditional and conventional teaching of economics whilst Volume III presents a concrete and practical example of how to build a Planning Accounting Framework PAF as associated with Frisch s plan frame explored in Volume II to demonstrate the extent to which decisions and negotiations can be routed in the social

sciences *Development Economics in the Twenty-First Century* Claudia Sunna, Davide Gualerzi, 2015-12-14 Development Economics has been identified as a homogeneous body of theory since the 1950s concerned both with the study of development issues and with the shaping of more effective policies for less advanced economies Development Economics in the Twenty First Century brings together an international contributor team in order to explore the origins and evolution of development economics This book highlights the different elements of high development theory through a precise reconstruction of the different theoretical approaches that developed between the 1950s and the 1970s These include the theory of balanced and unbalanced growth theory the debate on international trade the concept of dualism dependency theory structuralism and the analysis of poverty and institutions The chapters highlight the relevance and usefulness of these analyses for the contemporary theoretical debate on development issues Comparative perspectives are explored and analysed including those of Keynes Hirschman Krugman and Stiglitz The chapters situate development economics within current debates among economists and historians of economic thought providing a platform for future research This book is suitable for researchers and students with an interest in Development Economics the History of Economic development and the Economics of Developing Countries

"Are Economists Basically Immoral?" Paul T. Heyne, 2008 A well trained theologian a gifted and dedicated teacher of economics for over forty years and the author of a highly regarded and widely used textbook *The Economic Way of Thinking* Paul Heyne influenced generations of students of economics Many of the essays in this volume are published here for the first time The editors Geoffrey Brennan and A M C Waterman have divided Heyne s essays thematically to cover three general areas the ethical foundations of free markets the connection between those ethical foundations and Christian thought and the teaching of economics both method and substance Heyne s writings are unique in that he takes the critics of the free market order seriously and addresses their arguments directly showing how they are defective in their understanding of economics and in their ethical and theological underpinnings The engaging style of Heyne s essays makes them accessible to students as well as to scholars Even in discussions of topics well beyond the fundamental level Heyne still succeeds in providing students with an appreciation of basic economic principles
