Introductory Guide to Cardiac Catheterization Arman T. Askari, Medhi H. Shishehbor, Adrian W. Messerli, Ronnier J. Aviles, 2010-09-20 The staff in every catheterization laboratory in the world participates in some form of hazing. Although largely benign and expected, this ritual can place even more stress on an already unsettled and insecure newcomer. The first edition of this manual was spearheaded by cardiology fellows who remembered well what it was like to enter the cath lab for the first time. Now several years later, these hazingees have in many cases become the hazers, but the additional experience and responsibility has allowed for a more comprehensive and updated manual. Our goal is to produce a thoroughly practical and easily accessible manual for physicians, physicians in training, nurses, cath lab x-ray techs, mid-level providers, and students. Since we have been subjected to years of questions, first from our mentors and now from our students, we are acutely familiar with the most pertinent and necessary data for any student, no matter the level of training. The manual remains specifically designed with an easy-to-read format that includes highlighted pearls, updated American College of Cardiology/American Heart Association (ACC/AHA) guidelines, numerous visuals including carefully delineated schematics of standard coronary projections, and special troubleshooting notes that provide potential solutions for frequently encountered problems. Provided by publisher: **Handbook of Cardiovascular Interventions** Ulrich Sigwart, M. Bertrand, P. W. Serruys, 1996. Chapters are designed to be concise and practical, with the how-to-do-it approach necessary in a young field in which new devices appear regularly. Eighty-nine contributions are arranged in sections on percutaneous diagnostic assessment, interventions, valvular infections, vascular interventions, and peripheral arteries and veins. Contributors are the leading authorities in the field from around the world, providing an international perspective. Annotation copyright by Book News, Inc., Portland, OR. **Cardiac Catheterization** Barry F. Uretsky, 1997-04-28. Diagnostic Cardiac Catheterization is a concise, practical guide on diagnostic catheterization in adults for trainees. Covers techniques and fundamentals of evaluation and evaluation of specific conditions. *Cardiology Board Review and Self-Assessment: A Companion Guide to Hurst's the Heart* Mark Eisenberg, Jonathan Afilalo, Jacqueline Joza, Ravi Karra, Patrick Lawler, 2018-08-22.
