Moskop, 2007-08-26 Before a separate Department of Medical Humanities was formed the editors of this volume were faculty members of the Department of Pediatrics at our medical school Colleagues daily spoke of the moral and social problems of children s health care Our offices were near the examining rooms where children had their bone marrow procedures done Since this is a painful test we often heard them cry The hospital floor where the sickest children stayed was also nearby The physicians nurses and social workers believed that children s health care needs were not being met and that more could and

should be done Fewer resources are available for a child than for an adult with a comparable illness they said These experiences prompted us to prepare this volume and to ask whether children do get their fair share of the health care dollar Since the question What kind of health care do we owe to our children is complex responses should be rooted in many disciplines These include philosophy law public policy and of course the health professions Representing all of these disciplines contributors to this volume reflect on moral and social issues in children s health care The last hundred years have brought great changes in health care for children The specialty of pediatrics developed during this period and with it a new group of advocates for children s health care Women s suffrage gave a political boost to the recognition of children s special health needs Baby & Child Healthcare Miriam Stoppard,2001 This updated edition includes the very latest in child healthcare advice with extended sections on meningitis and cot death A new section on complementary medicine offers advice for parents on the best treatment available for their child **Health in Day Care** American Academy of Pediatrics. Committee on Early Childhood, Adoption, and Dependent Care,1987 Addressed especially to community pediatricians but also useful to other health workers this manual discusses aspects of day care that require a physician s attention Chapter I historically traces the positive effect of a nurturing environment upon the development of the infant and child covering the period from the early 1900s to the present Chapter II sets forth precise suggestions for program components advancing child health Chapter III depicts the role of the pediatrician in advocating day care adapted to serve children with special needs effectively and discusses several settings in which children with different disabilities can be accommodated Chapter IV addresses the issue of child abuse Chapter V describes measures that retard the spread of contagious diseases in day care facilities and makes suggestions for the prevention of infection Chapter VI reviews factors that increase the risk of injury to children in the day care setting Rules are provided for the maintenance of a safe environment and advice is given for handling injuries that do occur Chapters VII VIII and IX supply information intended to increase health professionals ability to serve effectively as consultants Many related materials are appended such as sample letters forms and several checklists but also including guidelines recommendations resource lists glossaries brief discussions and a national directory of state offices providing advice on safety RH Standards of Child Health Care Council on Pediatric Practice (U.S.),1967
