## Care Of The Critically Ill Second Edition:

**Care of the Critically Ill Patient** Jack Tinker, Warren M. Zapol, 2012-12-06 Nine years have passed since the first edition of *Care of the Critically Ill Patient* was published. As its editors Maurice Rapin and I were fortified by the many positive and helpful comments of reviewers and readers the work appeared to have fulfilled our original aims and objectives. Intensive care medicine has of course advanced and changed in many ways since 1982 and it therefore seemed appropriate to consider the preparation of a second edition. Encouraged by the reception of the first and the timely prompting of the publishers we began in 1986 to prepare for a new edition. Caring for critically ill patients is of universal concern and we were therefore delighted when Warren Zapol joined us as a co-editor widening our international base. The three of us subsequently spent many happy and productive times together planning the content, priorities, scale and contributions for the new edition. A great tragedy then overcame us. Maurice Rapin died suddenly. His death deprived us of a true friend and colleague who had been an international pioneer during the development of intensive care medicine. I will always remember with affection and professional pride the many hours he and I worked together in preparing the first edition of this book and also as founding editors of the now firmly established journal *Intensive Care Medicine*. An obituary written by Warren Zapol that appeared in the journal follows the Preface.

**Critical Care Study Guide** Gerard J. Criner, Rodger E. Barnette, Gilbert E. D'Alonzo, 2010-06-27 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up to date clinical information. An extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines a comprehensive multidisciplinary approach presenting the information is essential similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome, an expanded discussion of the physiology and operation of mechanical ventilation, obstetrical care in the ICU, neurosurgical emergencies, acute coronary syndromes, cardiac arrhythmias, role of whole body rehabilitation in the ICU, ethical conduct of human research in the ICU and nursing care of the ICU patient.
