Firm Size and the Business Environment Mirjam Schiffer, Beatrice Weder, 2001-01-01 The development of the small and medium enterprise sector is deemed crucial for economic growth and poverty alleviation Such firms are often thought to be at a disadvantage when compared with larger enterprises but the reverse can apply for example in the more flexible approach of the smaller firm This paper draws on a private sector survey in 80 countries examining whether business obstacles are related to firm size It finds a bias against small firms which experience significantly greater problems than large firms with financing taxes and regulations inflation corruption and street crime These problems should be the prime targets of policies aimed at reducing inequity

Cruise Vacations For Dummies 2004 Fran Wenograd Golden, 2003-09-12 A travel guidebook for persons interested in taking a cruise vacation

Handbook of Economic Growth Philippe Aghion, Steven Durlauf, 2013-12-20 Volumes 2A and 2B of The Handbook of Economic Growth summarize recent advances in theoretical and empirical work while offering new perspectives on a range of growth mechanisms from the roles

played by institutions and organizations to the ways factors beyond capital accumulation and technological change can affect growth. Written by research leaders, the chapters summarize and evaluate recent advances while explaining where further research might be profitable. With analyses that are provocative and controversial because they are so directly relevant to public policy and private decision making, these two volumes uphold the standard for excellence in applied economics set by Volumes 1A and 1B 2005. Offers definitive theoretical and empirical scholarship about growth economics. Empowers readers to evaluate the work of other economists and to plan their own research projects. Demonstrates the value of empirical testing with its implicit conclusion that our understanding of economic growth will help everyone make better decisions.

New And Enduring Themes In Development Economics Bhaskar Dutta, Tridip Ray, E Somanathan, 2009-07-29. This book is a compilation of selected papers presented at the ISI Indian Statistical Institute Platinum Jubilee Conference on Comparative Development held at the ISI Delhi India. The papers cover new and well established topics in development economics. Some of these include political economy, role of public outrage in delivering justice and the political economy of general strikes, economics of happiness, economics of labour, agricultural economics, macroeconomics and public finance. These topics are analyzed from the perspective of developing countries. The book will be of interest to both researchers and graduate students in development economics.

Applications of Optimal Transport to Economics and Related Topics Vladik Kreinovich, Woraphon Yamaka, Supanika Leurcharusmee, 2024-11-09. Often when a new successful data processing technique appears in one of the application areas, it then proves to be useful in many other areas. This was the case of optimal transportation techniques; these techniques were first developed for transportation problems but now they have been shown to be successful in many statistical applications, including applications to economics. These techniques are the main focus of this book, but this book also contains papers that use other techniques ranging from more traditional statistical approaches to more recent ones such as stochastic frontier methods, multivariable quantiles, random forest, and deep learning. Applications include all aspects of economics from production, including agricultural, to trade, including international and finances, with relation to issues of crime, including computer crime and cyberbullying, demographics, economic freedom, environment, health, and tourism. We hope that this volume will help practitioners to become better knowledgeable of the state of the art econometric techniques, especially optimal transport techniques, and help researchers to further develop these important research directions. We want to thank all the authors for their contributions and all anonymous referees for their thorough analysis and helpful comments. The publication of this volume was partly supported by the Faculty of Economics of the Chiang Mai University, Thailand. Our thanks to the leadership and staff of the Chiang Mai University for providing crucial support. Our special thanks to Prof Hung T Nguyen for his valuable advice and constant support.
