African Fractals Modern Computing And Indigenous Design:

African Fractals Ron Eglash, 1999 Fractals are characterized by the repetition of similar patterns at ever diminishing scales Fractal geometry has emerged as one of the most exciting frontiers on the border between mathematics and information technology and can be seen in many of the swirling patterns produced by computer graphics It has become a new tool for modeling in biology geology and other natural sciences Anthropologists have observed that the patterns produced in different cultures can be characterized by specific design themes In Europe and America we often see cities laid out in a grid pattern of straight streets and right angle corners In contrast traditional African settlements tend to use fractal structures circles of circles of circular dwellings rectangular walls enclosing ever smaller rectangles and streets in which broad avenues branch down to tiny footpaths with striking geometric repetition These indigenous fractals are not limited to architecture their recursive patterns echo throughout many disparate African designs and knowledge systems Drawing on interviews with African designers artists and scientists Ron Eglash investigates fractals in African architecture traditional hairstyling textiles sculpture painting carving metalwork religion games practical craft quantitative techniques and symbolic systems He also examines the political and social implications of the existence of African fractal geometry His book makes a unique contribution to the study of mathematics African culture anthropology and computer simulations

African Mathematics Abdul Karim Bangura, 2012 This is the first comprehensive text on African Mathematics that can be used to address some of the problematic issues in this area These issues include attitudes curriculum development educational change academic achievement standardized and other tests performance factors student characteristics cross cultural differences and studies literacy native speakers social class and differences equal education teaching methods knowledge level educational guidelines and policies transitional schools comparative education other subjects such as physics and social studies surveys talent educational research teacher education and qualifications academic standards teacher effectiveness lesson plans and modules teacher characteristics instructional materials program effectiveness program evaluation African culture African history Black studies class activities educational games number systems cognitive ability foreign influence and fundamental concepts What unifies the chapters in this book can appear rather banal but many mathematical insights are so obvious and so fundamental that they are difficult to absorb appreciate and express with fresh clarity Some of the more basic insights are isolated by accounts of investigators who have earned their contemporaries respect Winner of the 2012 Cecil B Currey Book Award *Stanford-Berkeley Joint Center for African Studies Annual Conference* Joint Center for African Studies. Applied Memory Matthew R. Kelley, 2009 The goal of the applied

memory volume is to highlight many interesting and creative applications of basic memory phenomena that are underrepresented or even unrepresented in the literature. Authors were charged with the task of reviewing relevant basic and applied research and offering new empirical investigations into the applications of these benchmark phenomena. To this end, *Applied Memory* consists of 17 chapters that explore the influences of generation irrelevant speech verbal overshadowing isolation part set cuing reminiscence hyperemnesia placebos mental state metamemory knowledge flashbulb events and traumatic events on memory in everyday settings as well as applications of source memory social memory involuntary autobiographical memory dream memory and strategic memory regulation. The volume is designed as a resource for basic and applied memory researchers and as a supplementary text in graduate or upper level undergraduate courses in cognitive psychology human memory or applied psychology.

Experiencing Geometry David Wilson Henderson, Daina Taimina, 2005. The distinctive approach of Henderson and Taimina's volume stimulates readers to develop a broader deeper understanding of mathematics through active experience including discovery discussion writing fundamental ideas and learning about the history of those ideas. A series of interesting challenging problems encourage readers to gather and discuss their reasonings and understanding. The volume provides an understanding of the possible shapes of the physical universe. The authors provide extensive information on historical strands of geometry straightness on cylinders and cones and hyperbolic planes triangles and congruencies area and holonomy parallel transport SSS ASS SAA and AAA parallel postulates isometries and patterns dissection theory square roots pythagoras and similar triangles projections of a sphere onto a plane inversions in circles projections models of hyperbolic planes trigonometry and duality 3 spheres and hyperbolic 3 spaces and polyhedra. For mathematics educators and other who need to understand the meaning of geometry.

The African American Experience In Cyberspace Gerald A. McWorter, Abdul Alkalimat, 2004. The World Wide Web is the greatest information resource used by students and teachers media and library professionals as well as the general public. However it's often difficult to identify the best and most reliable web sites. This easy to use guide is an indispensable handbook for anyone searching the web for information on Black Studies Multiculturalism and the African American Experience. There is no search engine that can match the quality of resources to be found in this book. Divided into clear chapters the guide highlights the best links and web sites covering every aspect of African American history society and culture. Each chapter has a brief essay an extensive annotation on the five best sites for each topic and then a group of good sites and a short bibliography. Ideal for students at high school or college level. *The African American Experience in Cyberspace* should also be kept near every home.
