African-American English Salikoko S. Mufwene, John R. Rickford, Guy Bailey, John Baugh, 2021-10-04 This book was the first to provide a comprehensive survey of linguistic research into African American English and is widely recognised as a classic in the field It covers both the main linguistic features in particular the grammar phonology and lexicon as well as the sociological political and educational issues connected with African American English The editors have played key roles in the development of African American English and Black Linguistics as overlapping academic fields of study Along with other leading figures notably Geneva Smitherman William Labov and Walt Wolfram they provide an authoritative diverse guide to these vitally important subject areas Drawing on key moments of cultural significance from the Ebonics controversy to the rap of Ice T the contributors cover the state of the art in scholarship on African American English and actively dispel misconceptions address new questions and explore new approaches This classic edition has a new foreword by Sonja Lanehart setting the book in context and celebrating its influence This is an essential text for courses on African American English key reading for Varieties of English and World Englishes modules and an important reference for students of linguistics black studies and anthropology at both undergraduate and postgraduate level

Africanisms in American Culture, Second Edition Joseph E. Holloway, 2005-08-03 A revised and expanded edition of a groundbreaking text

A Dictionary of Varieties of English Raymond Hickey, 2014-02-03 A Dictionary of Varieties of English presents a comprehensive listing of the distinctive dialects and forms of English spoken throughout the contemporary world

Provides an invaluable introduction and guide to current research trends in the field Includes definitions both for the varieties of English and regions they feature and for terms and concepts derived from a linguistic analysis of these varieties Explores important research issues including the transportation of dialects of English the rise of New Englishes sociolinguistic investigations of various English speaking locales and the study of language contact and change Reflects our increased awareness of global forms of English and the advances made in the study of varieties of the language in recent decades Creates an invaluable informative resource for students and scholars alike spanning the rich and diverse linguistic varieties of the most widely accepted language of international communication **Glocal English** Farooq A.

Kperogi,2015-06-22 Glocal English compares the usage patterns and stylistic conventions of the world s two dominant native varieties of English British and American English with Nigerian English which ranks as the English world s fastest growing non native variety courtesy of the unrelenting ubiquity of the Nigerian English language movie industry in Africa and the Black Atlantic Diaspora Using contemporary examples from the mass media and the author s rich experiential data the book isolates the peculiar structural grammatical and stylistic characteristics of Nigerian English and shows its similarities as well as its often humorous differences with British and American English Although Nigerian English forms the backdrop of the book it will benefit teachers of English as a second or foreign language across the world Similarly because it presents complex grammatical concepts in a lucid personal narrative style it is useful both to a general and a specialist audience including people who study anthropology and globalization The true life experiential encounters that the book uses to instantiate the differences and similarities between Nigerian English and native varieties of English will make it valuable as an empirical data mine for disciplines that investigate the movement and diffusion of linguistic codes across the bounds of nations and states in the age of globalization **The Morphology of African American English in African American**

Rap Lyrics Yasemin Genc,2009-11 Seminar paper from the year 2009 in the subject English Language and Literature Studies Linguistics grade 1 7 University of Cologne Englisches Seminar course B Seminar Morphology language English abstract This term paper will mainly focus on the morphological studies of Lisa J Green who is a Professor in the Department of Linguistics at the University of Texas and who published a linguistic introduction to African American English which focuses on the phonological morphological syntactical and semantic properties of this variety of American English In this paper we will firstly have a closer look at the well researched areas of African American English like origins and social history Subsequently certain morphological features like verbal s past morphology genitive marking and copula absence will be illustrated To bring evidence for the linguistic theses concerning morphology that will have been made in the first part rap texts by two well known African American rap artists will be taken into account This is due to the fact that authentic texts with sufficient morphological features of African American English are not easy to find However rap lyrics offer a wide range of morphological features that can provide evidence for many linguistic theses illustrated in this paper On account of this this

paper will analyze 60 rap texts by the African American artists Kanye West and Talib Kweli The aim hereby is to see whether African American English consequently pursues a morphological pattern or if the features occur optionally Is the widespread prejudice among many non linguists true Namley that African American English is a non rule based variety of English
