After Communism Perspectives On Democracy:

After Communism Donald R. Kelley, 2003-01-01 In this collection top scholars of Soviet and post Soviet studies convene to explore communism's aftermath. They consider state building and constitutionalism, the transition to market capitalism and democracy across Eastern Europe, the political development of Muslim states, the complex and differential developments of electoral systems, the risks and opportunities of nationalism, and new political and economic activities in Russia, from corruption to contracts. Editor Donald Kelley introduces the volume with a synthesis of the theoretical and empirical findings of the volume, and his brief chapter introductions place each contribution in relation to the other essays and to larger debates on democratization.

Postcommunism Michael Mandelbaum, 1996 This book offers distinctive perspectives by four leading students of politics on the single most important social, political, and economic development of the 1990s: post-communist Eurasia.

(Un)civil Societies Rachel A. May, Andrew K. Milton, 2007-01-01 Rachel A. May and Andrew K. Milton have assembled an array of scholars from different disciplines to examine transitional governments in Eastern Europe and Latin America. Drawing on specific political conditions and organized around topics such as the media, political parties, and political violence, *Un Civil Societies* broadens the discussion about democratization both thematically and geographically.

Leading Russia: Putin in Perspective Alex Pravda, 2005-05-26 Leaders and leadership continue to dominate Russia's political development. Like his predecessors in the Kremlin, Vladimir Putin has made a crucial impact on the substance and style of Russian politics. His efforts to use traditional tools of state power to manage democracy and market capitalism have had mixed effects on both. *Leading Russia* investigates the ambiguities and contradictions of Putin's rule from four perspectives. The volume first considers his leadership in the context of Russia's convulsive historical cycle of revolutionary transformation, breakdown, consolidation, and stagnation. The study then analyses how normative and institutional components of democracy have fared under Putin's regime of stronger executive control. It proceeds to examine the strengths and weaknesses of presidential power vis-à-vis bureaucratic, regional, and corporate groups. The volume concludes with two assessments of the strategic direction in which Putin is taking Russia. They explore the tensions between bureaucratic authoritarian trends and Putin's apparent commitment to electoral democracy, market capitalism, and alignment with the West. The book helps to deepen our understanding of the cultural and institutional factors shaping Putin's leadership approach and policy priorities. More widely, it sheds light on the complexity of the relationship between post-communist leadership, democracy, and economic modernization.

Democratic Consolidation in Eastern Europe: Volume 1: Institutional Engineering Jan Zielonka, 2001-06-14 This is the first volume in a series of books on democratic consolidation in Eastern Europe. The series focuses on three major aspects of democratic consolidation in Eastern Europe: institutional engineering, transnational pressures, and civil society. This first volume analyses constraints on and opportunities of institutional engineering in Eastern Europe, to what extent, and how elites in Eastern Europe have been able to shape, if not

manipulate the politics of democratic consolidation through institutional means The aim is to contrast a set of democracy theories with empirical evidence accumulated in Eastern Europe over the last ten years The volume tries to avoid complex debates about definitions methods and the uses and misuses of comparative research Instead it tries to establish what has really happened in the region and which of the existing theories have proved helpful in explaining these developments The volume starts with a presentation of conceptual and comparative frameworks followed by in depth empirical analyses of the thirteen individual countries undergoing democratic consolidation The first conceptual and comparative part contains three chapters The first chapter explains what institutional engineering is about and describes our experiences with institutional engineering in former transitions to democracy It also focuses on the import and export of institutional designs The second chapter analyses the utility of constitutions in the process of democratic consolidation The third chapter compares constitutional designs and problems of implementation in Southern and Eastern Europe The empirical case studies deal with the following countries Estonia Latvia Lithuania Bulgaria Romania Ukraine Russia Belarus the Czech Republic Slovakia Slovenia Hungary and Poland And the conclusions evaluate the enormous impact of institutions on politics in Eastern Europe and show how central constitutional designs are to the institutional engineering in the societies undergoing transitions to democracy

Central and Eastern European Media in Comparative Perspective John Downey, Sabina Mihelj, 2016-04-15

Appearing more than twenty years after the revolutions in Central and Eastern Europe this book could not have come at a more appropriate time a time to take stock not only of the changes but also the continuities in media systems of the region since 1989 To what extent are media institutions still controlled by political forces To what extent are media markets operating in Central and Eastern Europe Do media systems in Central and Eastern Europe resemble media systems in other parts of Europe The answers to these questions are not the same for each country in the region Their experience is not homogeneous An international line up of distinguished experts and emerging scholars methodically examine the different economic political cultural and transnational factors affecting developments in media systems across Central and Eastern Europe Whereas earlier works in the media system tradition have in the main adopted the political framework of comparative politics the authors argue that media systems are also cultural and economic institutions and there are other critical variables that might explain certain outcomes better Topics discussed range from political economy to gender inequality to the study of ethno cultural diversity This unmatched volume gives you the unique opportunity to study the growing field of
