After The Liberators:

After the Rebellion Sekou M. Franklin, 2014-07-11 Franklin argues that the political environment in the post Civil Rights era along with constraints on social activism made it particularly difficult for young black activists to start and sustain popular mobilization campaigns Building on case studies from around the country including New York the Carolinas California Louisiana and Baltimore *After the Rebellion* explores the inner workings and end results of activist groups such as the Southern Negro Youth Congress Student Nonviolent Coordinating Committee the Student Organization for Black Unity the Free South Africa Campaign the New Haven Youth Movement the Black Student Leadership Network the Juvenile Justice Reform Movement and the AFL CIO s Union Summer campaign *The B-24 Liberator Haulers* William Wolf, 2024-09-30 With iconic images depicting it in the skies over Occupied Europe or the Far East the B 24 Liberator is remembered for its part in the Allies bombing campaigns during the Second World War But there was another part to this famous four engine aircraft one that is less well known While the Douglas C 47 Dakota is deservedly celebrated as the most important twin engine transport aircraft of the war the early use of the four engine Consolidated B 24 Liberator bomber as a passenger carrier is virtually unknown but was as important Since the B 24 had more interior room than the B 17 it could be more easily be converted into a personnel carrier These early Liberators operated America s and Britain s early diplomatic missions and then were to be extensively flown by the Atlantic Ferry Organization and the Transport Commands on missions that opened the world to air transport as never before Several B 24s were converted for VIP personal and diplomatic use which included Harriman s Moscow and round the world diplomatic mission and those used by Churchill and Eisenhower to get around To meet the need for a cargo and personnel transport which had longer transoceanic range and improved high altitude performance than the C 47 in early 1942 the C 87 a hastily designed B 24 derivative was placed into production By installing a built up floor section that replaced the bomb bay doors the C 87 could carry six tons of cargo loaded through a cargo door cut into the side of its fuselage or through a special hinged door in its nose Most C 87s were operated by the US Ferrying Command and Air Transport Command by the late summer of 1943 they were extensively operating regular routes from the United States to the world s most remote areas To meet this increased requirement for air transport the ATC was forced to turn to four civil commercial airlines for help operating the system Of the 287 purpose built C 87s 24 were transferred to the RAF under Lend Lease for RAF Ferry and Transport Command The C 87 would remain as a prime mover until the dedicated C 54 Skymaster four engine transport came into service The 218 C 109s were fuel tanker conversions of completed B 24 bombers which had all armament removed and extra fuel tanks added to carry fuel from India for B 29s based in China Due to the lack of C 47s after D Day conventional B 24s were again converted for transporting vital supplies and bulk fuel to troops in France Once Allied troops broke out of the Normandy beachhead converted Liberators flew Trucking supply drop operations delivering emergency fuel and supplies to Patton s fuel starved armies racing across France
