**The Afterlife of Gardens** John Dixon Hunt, 2013-12-15 Most books on the history of gardens describe the way that gardens have been created by contrast The Afterlife of Gardens examines the way that gardens have been experienced Using examples from many sites around the world John Dixon Hunt examines responses to gardens from Renaissance sites to Baroque creations to modern motorway landscaping Examining how a garden has been experienced extends its history beyond the physical into cultural terms and the author describes how this afterlife of gardens as they are understood and experienced by many generations is often redesigned in visitors imaginative and cultural responses The author looks at many aspects of the subject including the enigmatic Hypnerotomachia Polifili of 1499 part fictional narrative and part scholarly treatise this fascinating early narrative of garden reception paves the way for an exploration of subsequent landscapes and their reception in later periods He also looks at Italian Renaissance gardens the Picturesque the architectural and inscriptional elements of gardens the ways experiences of gardens have been recorded and the different kinds of movement within gardens from the strolling pedestrian to the motorway traveller who experiences landscapes at speed In this ambitious new book the author shows how the complete history of a garden must extend beyond the moment of its design and the aims of the designer to record its subsequent reception He raises questions about the preservation of historical sites and provides lessons for the contemporary designer who may perhaps be more attentive to the life of a work after its design and implementation This book will interest all who have a professional interest in gardens as well as the wide general audience for gardens and landscapes of past and present

*Gardens in the Modern Landscape* Christopher Tunnard, 2014-07-11 Between 1937 and 1938 garden designer Christopher Tunnard published a series of articles in the British Architectural Review that rejected the prevailing English landscape style Inspired by the principles of Modernist art and Japanese aesthetics Tunnard called for a new technique in garden design that emphasized an integration of form and purpose The functional garden avoids the extremes both of the sentimental expressionism of the wild garden and the intellectual classicism of the formal garden he wrote it embodies rather a spirit of rationalism and through an aesthetic and practical ordering of its units provides a friendly and hospitable milieu for rest and recreation Tunnard's magazine pieces were republished in book form as *Gardens in the Modern Landscape* in 1938 and a revised second edition was issued a decade later Taken together these articles constituted a manifesto for the modern garden its influence evident in the work of such figures as Lawrence Halprin Philip Johnson and Edward Larrabee Barnes Long out of print the book is here reissued in a facsimile of the 1948 edition accompanied by a contextualizing foreword by John Dixon Hunt *Gardens in the Modern Landscape* heralded a sea change in the evolution of twentieth century design and it also anticipated questions of urban sprawl historic preservation and the dynamic between the natural and built environments Available once more to students practitioners and connoisseurs it stands as a historical document and an invitation to continued innovative thought about

landscape architecture [A World of Gardens](#) John Dixon Hunt, 2014-05-14 A Japanese garden is immediately distinct to the eye from the traditional gardens of an English manor house just as the manicured topiaries of Versailles contrast with the sharp cacti of the American Southwest Though gardening is beloved the world over the style of gardens themselves varies from region to region determined as much by culture as climate In this series of illustrated essays John Dixon Hunt takes us on a world tour of different periods in the making of gardens Hunt shows here how cultural assumptions and local geography have shaped gardens and their meaning He explores our continuing responses to land and reworkings of the natural world encompassing a broad range of gardens from ancient Roman times to early Islamic and Mughal gardens from Chinese and Japanese gardens to the invention of the public park and modern landscape architecture *A World of Gardens* looks at key chapters in garden history reviewing their significance past and present and tracing the recurrence of different themes and motifs in the design and reception of gardens throughout the world *A World of Gardens* celebrates the idea that similar experiences of gardens can be found in many different times and places including sacred landscapes scientific gardens urban gardens secluded gardens and symbolic gardens Featuring two hundred images this book is a treasure trove of ideas and inspiration whether your garden is a window box a secluded backyard or a daydream

[A Cultural History of Gardens in the Modern Age](#) John Dixon Hunt, 2015-05-01 Landscape architecture and garden making have witnessed huge changes during the twentieth century and the impact of these will continue to be discussed and interpreted in the twenty first New materials and responses to different social conditions along with new attitudes to how gardens are perceived and interpreted and above all the relationship of built work to the larger landscape of territory and society all have challenged long held practices of garden making even while those same traditions continue to be at the centre of both designers and users **Site, Sight, Insight** John Dixon Hunt, 2016-03-07 *Site Sight Insight* presents twelve essays by John Dixon Hunt the leading theorist and historian of landscape architecture The collection's common theme is a focus on sites how we see them and what we derive from that looking Acknowledging that even the most modest landscape encounter has validity Hunt contends that the more one knows about a site and one's own sight of it an awareness of how one is seeing the greater the insight Employing the concepts tropes and rhetorical methods of literary analysis he addresses the problem of how to discuss understand and appreciate places that are experienced through all the senses over time and through space Hunt questions our intellectual and aesthetic understanding of gardens and designed landscapes and asks how these sites affect us emotionally Do gardens have meaning When we visit a fine garden or designed landscape we experience a unique work of great complexity in purpose which has been executed over a number of years a work that occasionally achieves beauty While direct experience is fundamental Hunt demonstrates how the ways in which gardens and landscapes are communicated in word and image can be equally important He returns frequently to a cluster of key sites and writings on which he has based much of his thinking about garden making and its role in landscape architecture the gardens of Rousham in Oxfordshire Thomas Whately's
