Against The State Of Nuclear Terror:

Against the State of Nuclear Terror Joel Kovel, 1984 A look at the political economic and psychological levels of the nuclear crisis There are says Koval two kinds of nuclear states There is the nuclear state apparatus whose ruling principle is domination through science and there is the nuclear state of being which includes the psychology of living under the nuclear gun The nuclear crisis is not a matter technically adjusting the nature and number of warheads but the agony and paranoia of an entire civilization Back cover

Just War on Terror? Brian Wicker, 2016-04-22 Following the 9 11 attacks by Al Qa ida President Bush declared war on terror In the succeeding years Western governments have struggled to find the right way to respond to the new and deadly threat posed by terrorism With the election of President Obama the rhetoric has softened and policies have been adjusted but the underlying problems and challenges remain the same Meanwhile the war on terrorism in Afghanistan has been intensified Drawing on just war teaching as developed within both Christian and Muslim traditions this book examines whether and how liberal democracies can combat the new global terrorism both effectively and justly The authors including distinguished academics from both sides of the Atlantic Christian and Muslim theologians former senior civil servants and a General deploy a wide range of experience and expertise to address one of the most difficult and pressing ethical challenges to contemporary society

State Responsibility for International Terrorism Kimberley N. Trapp, 2011-06-02 The rules of state responsibility have an important but under utilized role to play in the terrorism context They determine both whether a breach of primary obligations has occurred through the rules of attribution and the consequences which flow from that breach including the possible adoption of responsive measures by injured states This book explores the substantive international legal obligations and rules of state responsibility applicable to international terrorism and examines the problems and prospects for effectively holding states responsible for internationally wrongful acts related to terrorism In particular it analyses the way in which the implementation of state responsibility for international terrorism may be affected by the self determination debate any applicable *lex specialis* including the *jus in bello* and sub systems of international law such as the WTO as well as the interaction between determinations of individual criminal responsibility and the implementation of state responsibility The international community has responded to the threat of international terrorism both through a security *jus ad bellum* paradigm and by creating an international criminal law framework to address the conduct of non state terrorist actors The secondary rules of state responsibility analysed in this book cut across both approaches as they apply whether states breaching their primary obligations relating to terrorism

through participation in or a failure to prevent or punish terrorism While this book identifies a number of problems in implementing state responsibility for international terrorism it also highlights the prospects for the rules of state responsibility to make a crucial contribution to maintaining respect for obligations which lie at the very foundations of the contemporary international legal order and to restoring the relationships between states if those obligations are breached

Committee on Armed Services,2010 *Deterring State Sponsorship of Nuclear Terrorism* Michael A. Levi,2008 The basis of nuclear doctrine during the Cold War was deterrence Nuclear powers were deterred from attacking each other by the fear of retaliation Today much of the concern over possible nuclear attack comes in the context of rogue states and terrorism And since only states are known to possess nuclear weapons an important question is how to deter them from letting terrorists acquire a device whether through an authorized transfer or a security breach Michael A Levi analyzes this aspect of deterrence in the post Cold War world as well as what to do if deterrence breaks down He suggests how to discourage states from giving weapons or nuclear materials to terrorists and how to encourage states to bolster security against any accidental transfer The report also discusses the role of nuclear attribution the science of identifying the origin of nuclear materials in deterring transfers an essential link in assigning responsibility to governments for transfers of nuclear materials *Deterring State Sponsorship of Nuclear Terrorism* offers thoughtful analysis and practical guidelines for U S policy on a complex and important question and makes an important contribution to the thinking in an underexplored but unavoidable area of the post Cold War security debate **Congressional Record** United States.
