Age Of Anxiety Conspiracy Theory And The Human Sciences:

The Age of Anxiety Parish. Jane, *Re-crafting Rationalization* Simon Locke, 2016-03-23 Re-crafting Rationalization contributes to debates relating to the public understanding of science regarding the conceptualization of the relationship between science and the public. It challenges the prevailing science-centred or top-down framework that currently informs notions of public engagement and knowledge transfer, offering an alternative that remains firmly grounded in the discourse of classical social theory. By proposing an alternative version of rationalization to the standard interpretation of Weber's disenchantment thesis, this book establishes the public understanding of science as a matter of fundamental sociological concern. As such, it redefines this field to emphasize public meanings of science, engaging with a range of topics of major interest to the public and popular meaning of science, including science and religion, science fiction and fantasy, fringe science and media representations of science. Combining rhetorical analysis with ethnomethodology and membership categorization analysis, the book outlines the basis of a new approach to the sociology of knowledge in the light of which Weber's rationalization thesis is radically re-crafted in relation to studies of scientists' discourse, the rhetoric of science, popularization and public usages of science. This re-crafted rationalization is applied in a series of detailed empirical studies of enchanted science, creationism and intelligent design, Scientology and reflexive spirituality, superhero comics and mundane mysteries, Fortean discourse, conspiracy theory and media representations of the scientist in the case of Jack the Ripper. Re-crafting Rationalization therefore redresses a significant shortcoming in contemporary social theory which currently overlooks or misrepresents important public meanings of science whilst excluding popular culture from attention. With profound implications for the ways in which we make sense of developments involving science, this book will be of interest not only to sociologists and social theorists but also to those interested in popular culture and subcultures and the history, philosophy and sociology of science.

Ethnic Conflict and War Crimes in the Balkans Jelena Obradovic, 2013-07-15 In the years following the fall of Slobodan Milosevic, Serbian social, cultural and political responses to the wars of the 1990s have fallen under intense scrutiny. In *Ethnic Conflict and War Crimes in the Balkans*, Jelena Obradovic Wochnik explores some of those responses, taking into consideration notions such as silence, denial and conspiracy theory. The book sheds some light on the complicated narratives about the 1990s. The book considers the experience of knowing, witnessing and speaking about atrocities and thus contributes to the debates on confronting the past in Serbia. Specifically, it considers how individuals of the ordinary public in Serbia reflect upon, understand and keep secrets about the 1991-1999 conflicts in Croatia, Bosnia and Herzegovina and Kosovo and the atrocities, human rights abuses and war crimes which were committed there. Close attention is paid to the stories of individuals whose voices and experiences are generally excluded from the broader debate about the past. Jelena Obradovic Wochnik explores how these narratives diverge from, resist and are invisible to the formal and civil society initiatives aimed at confronting the past in Serbia. In doing so, the book also explores silence, about and denial of the

violent past and considers how and where these dynamics manifest and what they might mean In addition it covers themes such as narratives of self victimhood conspiracy theory and the perception of war time leaders and combatants This is a detailed and considered investigation into how groups cope with knowledge and the witnessing of violent pasts It is based on ethnographic research and interviews with a group of ordinary individuals in post Milosevic Serbia As such it provides a unique perspective on the lived experience of the conflicts and the ways in which stories of the 1990s emerge in everyday contexts *Bret Easton Ellis's Controversial Fiction* Sonia Baelo-Allué,2011-06-23 **Witches, Westerners, and HIV**

Alexander Rödlach,2016-09-17 A witch s curse an imperialist conspiracy a racist plot HIV AIDS is a catastrophic health crisis with complex cultural dimensions From small villages to the international system explanations of where it comes from who gets it and who dies are tied to political agendas religious beliefs and the psychology of devastating grief Frequently these explanations conflict with science and clash with prevention and treatment programs In *Witches Westerners and HIV* Alexander R dlach draws on a decade of research and work in Zimbabwe to compare beliefs about witchcraft and conspiracy theories surrounding HIV AIDS in Africa He shows how both types of beliefs are part of a process of blaming others for AIDS a process that occurs around the globe but takes on local culturally specific forms He also demonstrates the impact of these beliefs on public health and advocacy programs arguing that cultural misunderstandings contribute to the failure of many well intentioned efforts This insightful book provides a cultural perspective essential for everyone interested in AIDS and cross cultural health issues **The Organization of Things** Martin Parker,2024-11-14 This is a book about knowledge and how it is organized The business school has captured ideas about organization and reduced them to questions of formal structures documented processes logistics and operations This book shows how the concept can be understood more
