Age Of Rembrandtpictures From The

Ernst van de Wetering

Age Of Rembrandt pictures From The:

Pictures of the Age of Rembrandt. Selections From the Personal Collections of Dr. And Mrs. Bader David McTavish, 1984

The Story of Art Throughout the Ages Salomon Reinach, 1904 Paintings of Many Lands and Ages Albert W.

Heckman, 1925 Part of the Oglie Family Papers

A Corpus of Rembrandt Paintings VI Ernst van de Wetering, 2014-11-11

A revised survey of Rembrandt's complete painted oeuvre. The question of which 17th century paintings in Rembrandt's style were actually painted by Rembrandt himself had already become an issue during his lifetime. It is an issue that is still hotly disputed among art historians today. The problem arose because Rembrandt had numerous pupils who learned the art of painting by imitating their master or by assisting him with his work as a portrait painter. He also left pieces unfinished to be completed by others. The question is how to determine which works were from Rembrandt's own hand. Can we, for example, define the criteria of quality that would allow us to distinguish the master's work from that of his followers? Do we yet have methods of investigation that would deliver objective evidence of authenticity? To what extent do research techniques used in the physical sciences help? Or are we after all still dependent on the subjective expert eye of the connoisseur? The book provides answers to these questions. Prof. Ernst van de Wetering, the author of our forthcoming book which deals with these questions, has been closely involved in all aspects of this research since 1968, the year the renowned Rembrandt Research Project (RRP) was founded. In particular, he played an important role in developing new criteria for authentication. Van de Wetering was also witness to the way the often overly zealous tendency to doubt the authenticity of Rembrandt's paintings got out of hand. In this book, he re-attributes to the master a substantial number of unjustly rejected Rembrandts. He also was closely involved in the re-discovery of a considerable number of lost or completely unknown works by Rembrandt. The verdicts of earlier specialists, including the majority of members of the original RRP up to 1989, were based on connoisseurship, the self-confidence in one's ability to recognise a specific artist's style and hand. Over the years, Van de Wetering has carried out seminal research into 17th century studio practice and ideas about art current in Rembrandt's time. In this book, he demonstrates the fallibility of traditional connoisseurship, especially in the case of Rembrandt, who was par excellence a searching artist. The methodological implications of this critical view are discussed in an introductory chapter which relates the history of the developments in this turbulent field of research. Van de Wetering's account of his own involvement in it makes this book a lively and sometimes unexpectedly personal account. The catalogue section presents a chronologically ordered survey of Rembrandt's entire painted oeuvre of 336 paintings, richly illustrated and annotated. For all the paintings re-attributed in this book, extensive commentaries have been included that provide a multi-faceted new insight into Rembrandt's world and the world of art historical research. *Rembrandt's Paintings Revisited* is the concluding sixth volume of *A Corpus of Rembrandt Paintings* (Volumes I-V, 1982, 1986, 1989, 2005, 2010). It can also be read as a revisionary critique of the first three volumes published by the old RRP team up till 1989 and of Gerson's influential survey of Rembrandt

s painted oeuvre of 1668-69. At the same time the book is designed as an independent overview that can be used on the basis that anyone seeking more detailed information will be referred to the five previous digital versions of the Volumes and the detailed catalogues published in the meantime by the various museums with collections of Rembrandt paintings. This work of art history and art research should belong in the library of every serious art historical institute, university or museum.

Apollo; an illustrated manual of the history of art throughout the ages Solomon Reinach, 1907 **The Drawings of Rembrandt** Seymour Slive, Rembrandt Harmenszoon van Rijn, 2009. This sweeping overview of Rembrandt's extraordinary achievement as a draughtsman fills a gap in the otherwise enormous literature on the artist. Beautifully illustrated, mostly in colour, the more than 150 drawings culled from a corpus of some 800 are discussed in detail. The drawings span Rembrandt's entire productive life as an artist, from early self-portraits in the 1620s to late drawings from the 1660s of the victim of an execution, a state coach, and historical and mythological images. The scope of the book will allow readers to delve into the very broad range of Rembrandt's oeuvre of drawings. [A Corpus of Rembrandt Paintings IV](#) Ernst van de Wetering, 2010-07-19. Volume IV of *A Corpus of Rembrandt Paintings* deals uniquely with the self-portraits of Rembrandt. In a clearly written explanatory style, the head of the Rembrandt Research Project and Editor of this Volume, Ernst van de Wetering, discusses the full body of work of paintings and etchings portraying Rembrandt. He sets the different parameters for accepting or rejecting a Rembrandt self-portrait as such, whilst also discussing the exact working environment of Rembrandt and his apprentices. This workshop setting created a surroundings where apprentices could be involved in working on Rembrandt paintings, making it more difficult to determine the hand of the master. Van de Wetering, who is one of the Rembrandt experts of our day and age, goes down to great detail to explain how the different self-portraits are made and what techniques Rembrandt uses, also giving an overview of which paintings are to be attributed to the Dutch Master and which not. In the additional catalogue the self-portraits are examined in detail. In clear and accessible explanatory text, the different paintings are discussed, larded with immaculate images of each painting. Details are shown where possible, as well as the results of modern-day technical imaging like X-radiography. This work of art history and art research should be part of every serious art historical institute, university or museum. Nowhere in the art history have all Rembrandt's self-portraits been discussed in such a detailed and comparative manner by an authority such as Ernst van de Wetering. This is a standard work for decades to come.

Rembrandt in the Collections of the National Gallery of Victoria National Gallery of Victoria, Rembrandt Harmenszoon van Rijn, John Gregory, Irena Zdanowicz, 1988. This comprehensive and lushly illustrated volume considers Rembrandt from three basic viewpoints: collecting, paintings, drawings, and prints. As he was an enormously prolific draftsman, over 2,000 of his drawings survive, and 300 etchings, a third of which are housed in the National Gallery of Victoria, Melbourne. The information on his prints is especially informative, covering his techniques, the Dutch tradition, self-portraits, religious subjects, landscapes, nudes, genre illustration. Provocative text covers periods of art collecting, issues of attribution.

and varying patterns of estimation about him during the 20th century Analyses of works are original and thought provoking
