*God in the Age of Science?* Herman Philipse, 2012-02-23 Herman Philipse puts forward a powerful new critique of belief in God He examines the strategies that have been used for the philosophical defence of religious belief and by careful reasoning casts doubt on the legitimacy of relying on faith instead of evidence and on probabilistic arguments for the existence of God **The Age of Everything** Matthew Hedman, 2008-08-13 Taking advantage of recent advances throughout the sciences Matthew Hedman brings the distant past closer to us than it has ever been Here he shows how scientists have determined the age of everything from the colonization of the New World over 13 000 years ago to the origin of the universe nearly fourteen billion years ago Hedman details for example how interdisciplinary studies of the Great Pyramids of Egypt can determine exactly when and how these incredible structures were built He shows how the remains of humble trees can illuminate how the surface of the sun has changed over the past ten millennia And he also explores how the origins of the earth solar system and universe are being discerned with help from rocks that fall from the sky the light from distant stars and even the static seen on television sets Covering a wide range of time scales from the Big Bang to human history *The Age of Everything* is a provocative and far ranging look at how science has determined the age of everything from modern mammals to the oldest stars and will be indispensable for all armchair time travelers We are used to being told confidently of an enormous measurable past that some collection of dusty bones is tens of thousands of years old or that astronomical bodies have an age of some billions But how exactly do scientists come to know these things That is the subject of this quite fascinating book As told by Hedman an astronomer each story is a marvel of compressed exegesis that takes into account some of the most modern and intriguing hypotheses Steven Poole Guardian Hedman is worth reading because he is careful to present both the power and peril of trying to extract precise chronological data These are all very active areas of study and as you read Hedman you begin to see how researchers have to be both very careful and incredibly audacious and how much

of our understanding of ourselves through history through paleontology through astronomy depends on determining the age of everything Anthony Doerr Boston Globe      **Science and Liberal Education in the Space Age** Glenn Theodore Seaborg,1959      The Second Age of Computer Science Subrata Dasgupta,2018 Between the genesis of computer science in the 1960s and the advent of the World Wide Web around 1990 computer science evolved in significant ways The author has termed this period the second age of computer science This book describes its evolution in the form of several interconnected parallel histories      The Religion of Science William Hamilton Wood,1922      **The Open Court** Paul Carus,1907 vols 46 47 have special title New Orient Society monograph      *Littell's Living Age* ,1882      The School World ,1911      **Great Tales of the Golden Age of Science Fiction** ,1991 The nine outstanding short novels in this collection of bestselling authors are as relevant today as when they first appeared during the 1940 s These representative works by Theodore Sturgeon Jack Williamson Isaac Asimov A E van Vogt Ross Rocklynne Lester del Rey A Bertam Chandler T L Sherred and C L Moore are some of the best short science fiction novels of any time 22 95 value      The Journal of Mental Science ,1910      **The Popular Science Monthly** ,1875      **The Living Age** ,1908
