Fishkin, Amaury Goguel, 2018-08-04 This book provides an up to date guide to managing Country Risk It tackles its various and interlinked dimensions including sovereign risk socio political risk and macroeconomic risk for foreign investors creditors and domestic residents It shows how they are accentuated in the global economy together with new risks such as terrorism systemic risk environmental risk and the rising trend of global volatility and contagion The book also assesses the limited usefulness of traditional yardsticks of Country Risk such as ratings and rankings which at best reflect the market consensus without predictive value and at worst amplify risk aversion and generate crisis contamination This book goes further than comparing a wide range of risk management methods in that it provides operational and forward looking warning signs of Country Risk The combination of the authors academic and market based backgrounds makes the book a useful tool for scholars analysts and practitioners

**Complexity Thinking: Science in the Age of Alternative Truths** Cornelis Pieter Pieters, 2024-04-26 Many scholars agree that we are currently living in post ideological times and that the role of religion and social ideology has become increasingly limited as a means to organise society Some even talk of a post truth era as truth itself has become suspect and public debate has become infected with terms such as fake news and alternative truths In fact in many scientific areas the notions of truth objectivity and fact are being questioned and are often even considered instruments that aim to perpetuate relationships of power of elites This book aims to take a position in these debates by looking at the often implicit associations behind truth objectivity and fact By taking a complexity informed dialectical approach a more encompassing understanding of these concepts can be developed that both respects the formidable achievements of science while being sensitive to the critique that has been raised most notably by postmodern thought

**Passion killers: The art of passion killing in the age of stress and anxiety** Phillip Walden Bowen, 2021-09-07 There is growing pressure and stress placed on organisations to fight for customers and service product placement in an increasingly competitive global marketplace It has therefore never been more important to get the best out of the workforce To achieve this the role of the leader can be a fundamental factor in organisational success or failure Leaders need to have the requisite skills to reflect the demands placed upon them in the 21st century There are the accidental managers who just drop into the role of leadership and others who may develop skills and knowledge in readiness for a leadership role There are also those who may have the innate ability to lead Within the mix are those who are characterised by traits associated with the dark triad or who may use pathocratic influence on others to conform reinforcing values or lack of values associated with toxic leadership They create damage and harm They become passion killers The

**My Age**

**of Anxiety** Scott Stossel, 2014-01-07 A riveting revelatory and moving account of the author's struggles with anxiety and of the history of efforts by scientists, philosophers and writers to understand the condition. As recently as thirty-five years ago, anxiety did not exist as a diagnostic category. Today it is the most common form of officially classified mental illness. Scott Stossel gracefully guides us across the terrain of an affliction that is pervasive yet too often misunderstood. Drawing on his own long-standing battle with anxiety, Stossel presents an astonishing history, at once intimate and authoritative, of the efforts to understand the condition from medical, cultural, philosophical and experiential perspectives. He ranges from the earliest medical reports of Galen and Hippocrates through later observations by Robert Burton and Søren Kierkegaard to the investigations by great nineteenth-century scientists such as Charles Darwin, William James and Sigmund Freud as they began to explore its sources and causes, to the latest research by neuroscientists and geneticists. Stossel reports on famous individuals who struggled with anxiety as well as on the afflicted generations of his own family. His portrait of anxiety reveals not only the emotion's myriad manifestations and the anguish anxiety produces, but also the countless psychotherapies, medications and other often outlandish treatments that have been developed to counteract it. Stossel vividly depicts anxiety's human toll, its crippling impact, its devastating power to paralyze, while at the same time exploring how those who suffer from it find ways to manage and control it. *My Age of Anxiety* is learned and empathetic, humorous and inspirational, offering the reader great insight into the biological, cultural and environmental factors that contribute to the affliction.
