Amédée Burat,1872 *Metaphysics and the Sciences in Nineteenth-Century France* ,2025-07-22 This volume is the first
systematic study of the style of reasoning specific to the field of philosophy in nineteenth century France The chapters
analyze the often dispersed responses to the fundamental question of the division of the sciences based on the reciprocal
relationships of inclusion or exclusion of adversity or sorority between metaphysics and the positive sciences In line with the
arrhythmic progress of the different forms of knowledge these responses renew the Condillacian criticisms of the Cartesian
order of the relationships between metaphysics and physics Between a pronounced divorce and a successful marriage this
volume traces the philosophical history of the various attempts at divorce or union which as the century progressed resulted
