Cardiopulmonary Bypass and Mechanical Support Glenn P. Gravlee, Richard F. Davis, John Hammon, Barry Kussman, 2015-10-13 Offering a unique multidisciplinary approach to the complexities of CPB the 4th Edition of **Cardiopulmonary Bypass and Mechanical Support Principles Practice** remains the gold standard in the field This edition brings you fully up to date with every aspect of cardiopulmonary bypass including new information on management of pediatric patients CPB s role with minimally invasive and robotic cardiac surgery mechanical circulatory support miniaturized circuits and CPB sickle cell disease and CPB management and much more A newly expanded title reflects the rapidly evolving nature of extracorporeal technology encompassing both short term and long term forms of cardiac and pulmonary support

Cardiopulmonary Bypass Glenn P. Gravlee, 2008 Established as the standard reference on cardiopulmonary bypass Dr Gravlee s text is now in its Third Edition This comprehensive multidisciplinary text covers all aspects of cardiopulmonary bypass including sections on equipment physiology and pathology hematologic aspects and clinical applications This edition features a new section on cardiopulmonary bypass in neonates infants and children and a new chapter on circulatory support for minimally invasive cardiac surgery Other highlights include state of the art information on low volume circuits and other new equipment and discussions of outcomes data for on pump and off pump surgeries

Techniques in Extracorporeal Circulation 4E Philip Kay, Christopher M Munsch, 2004-04-30 Extracorporeal circulation has become firmly established as an invaluable and routine adjunct to cardiac and vascular surgery Since its introduction in 1953 the technique has evolved rapidly with advancing technology leading to improvements in and simplification of the equipment involved Developments in the understanding and application of basic science have also had a huge impact as our understanding of the complex anatomy biochemistry pharmacology and pathophysiology of the heart continues to grow It is these advances in both technology and science that form the basis of this fourth edition of **Techniques in Extracorporeal Circulation** The book continues to provide a comprehensive overview of the field covering both established techniques for those new to the field of extracorporeal circulation and current and future developments It attempts to answer some of the innumerable practical problems associated with the routine use of artificial circulation and oxygenation and hopes to stimulate thought and debate among its readers regarding more complex or controversial issues Topics new to the fourth edition include robotic surgery and off pump surgery while other chapters have been thoroughly revised and updated to take into account developments and changes in the field With its multidisciplinary approach the book will remain an essential reference for all health care professionals working in the cardiac surgical operating room in particular

Cardiopulmonary Bypass K. M. Taylor, 1986 This up to date comprehensive account of the principles and practice of cardiopulmonary bypass techniques is written by a team of leading international authorities in the field The main sections of the book deal with cannulation techniques perfusion oxygenation

and circuit priming There are specialist chapters on anaesthesia paediatric perfusion intra aortic balloon counter pulsation extra corporeal membrane oxygenation gaseous microemboli and blood biomaterial compatibility The book is illustrated and fully referenced and represents the essentials of modern cardiopulmonary bypass practice It is a useful reference text for those involved in this aspect of open heart surgery

Cardiac Surgery A.C. Cernaianu,A.J. DelRossi,2012-12-06 The topics in this book represent the presentations given at the Seventh Annual Meeting entitled Cardiac Surgery Current Issues held at the Frenchman s Reef Beach Resort St Thomas U S Virgin Islands November 9 12 1994 This symposium was sponsored by the American College of Chest Physicians in conjunction with the Division of Cardiothoracic Surgery of Cooper HospitalUniversity Medical Center the University of Medicine and Dentistry of New Jersey Robert Wood Johnson Medical School Camden New Jersey Chapter authors were charged with the task of writing brief overviews of major issues related to the field of cardiac surgery The book is specifically tailored to the needs of cardiothoracic surgeons cardiovascular perfusionists allied health professionals and nursing personnel involved in all phases of caring for the cardiac surgical patient Although intended as a reference source with emphasis on updated approaches applied in cardiac surgery it is hoped that the discussion of these topics will compliment other texts and manuscripts Obviously a book of this length cannot cover the whole multidisciplinary and complex field of cardiac surgery However co editors are certain that the annual appearance of this text will highlight comprehensive new and interesting approaches to the field of cardiac surgery The co editors are greatly thankful to the contributors for their efforts in providing comprehensive chapters Without their expertise this work may not have been possible We would also like to thank Ms Eileen Birmingham and the staff at Plenum Publishing Corporation for their tremendous help in completing this work

Cardiopulmonary Bypass Charles C. Reed,1985

Towards Safer Cardiac Surgery D.B. Longmore,2012-12-06 D B LONGMORE The concept of the meeting on which this book is based is unique There has never before been a multi disciplinary meeting based entirely on the concept of making a major branch of surgery safer Hopefully this meeting will be archetypal and will set a precedent for similar attempts in other disciplines as well as future efforts to make cardiac surgery safer Cardiac surgery is still a rapidly growing discipline even after a quarter of a century of experience Like any new area of science or medicine initially there is an exponential growth of work publications meetings options of available equipment and all the ancillary and peripheral disciplines associated with it The ideas of the handful of original surgical pioneers some of whom have contributed to this book formed the basis of a still rapidly growing young branch of surgery with a whole new medical discipline of total extracorporeal circulation involving biochemical and haemodynamic control of a patient
