Caring For The Seriously Ill Patient:

Caring for the Seriously Ill Patient Michael Macintosh, Tracey Moore, 2018-01-15 This book serves as an essential guide for all nurses caring for seriously ill patients on acute general wards and in high dependency units With an emphasis on knowledge and skills the anatomy and physiology of each body system is explored looking at the major associated conditions and illnesses and how the patient is assessed and monitored

Home Care of the Sick Amy Elizabeth Pope, 1907 **Oxford Textbook of Palliative Nursing** Betty Rolling Ferrell, Judith A. Paice, 2019-02-15 The Oxford Textbook of Palliative Nursing remains the most comprehensive treatise on the art and science of palliative care nursing available Dr Betty Rolling Ferrell and Dr Judith A Paice have invited 162 nursing experts to contribute 76 chapters addressing the physical psychological social and spiritual needs pertinent to the successful palliative care team Organized within 7 Sections this new edition covers the gamut of principles of care from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond This fifth edition features several new chapters including chapters on advance care planning organ donation self care global palliative care and the ethos of palliative nursing Each chapter is rich with tables and figures case examples for improved learning and a strong evidence based practice to support the highest quality of care The book offers a valuable and practical resource for students and clinicians across all settings of care The content is relevant for specialty hospice agencies and palliative care programs as well as generalist knowledge for schools of nursing oncology critical care and pediatric Developed with the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill this new edition will continue to serve as the cornerstone of palliative care education

Geriatrics Models of Care Michael L. Malone, Elizabeth A. Capezuti, Robert M. Palmer, 2015-05-22 This book describes geriatrics practice models that are used to guide the care of older adults allowing seniors to remain at home prevent functional disability and preserve quality of life The models include specific interventions which are performed by health care workers to address the needs of older persons and their caregivers These models respect patient values consider patient safety and appreciate psychosocial needs as well Divided into six parts that discuss hospital based models of care transitions from hospital to home outpatient based models of care and emergency department models of care this text addresses the needs of vulnerable patients and the community Geriatric Models of Care is an excellent resource for health care leaders who must translate these programs to address the needs of the patients in their communities

Manual of Critical Care Nursing - E-Book Marianne Saunorus Baird, 2015-11-13 NEW Bariatric Considerations section added to assessment sections to help you assess and prevent complications and improve care in overweight and obese patients NEW Section on Caring for the Elderly added to assessment sections to provide you with tips and guidelines unique to elderly patients including recognizing differences in measuring pain providing appropriate nutritional support improving communication and preventing infection NEW Updated content throughout keeps you current in the field of critical care

nursing NEW Geriatric icon highlights considerations relating to the care of older adults NEW The latest NANDA I nursing diagnoses ensure you stay up to date Neurology Robin Howard, Dimitri Kullmann, David Werring, Michael Zandi, 2024-05-06 neurology A fully updated and authoritative neurology resource The Queen Square Textbook has established itself as a favourite companion to clinical neurosciences training and teaching around the world whilst retaining its role as an invaluable reference guide for physicians and other healthcare professionals working in neurology general medicine and related specialties The book continues to reflect the core values essential to the practice of clinical neurology in the 21st century The third edition has been extensively revised and updated to take account of the rapid pace of progress in the neurosciences and patient care Contemporary neurology has been changed by the COVID 19 pandemic the climate emergency and the growing inequalities in healthcare resources The new edition has been extensively revised to reflect these challenges and affords a greater emphasis on management and rehabilitation whilst continuing to reflect the coherence of a text produced from a single closely knit centre of excellence Highlights of the new edition include An updated approach to clinical examination decision making and diagnosis New developments in neuroimmunology pathology and genetics Neuropalliative care Ethical and legal issues in clinical neurology The latest developments in the understanding and management of stroke movement disorders epilepsy cognitive impairment multiple sclerosis infections myelopathy anterior horn cell disease disorders of nerve and muscle neuro oncology neurological disorders of hearing balance and vision and the neurological care of critical illness sleep neuropsychiatry pain autonomic and urological disorders An emphasis on treatment and rehabilitation of the person with a neurological disease The new edition marks a significant transition to reflect contemporary neurological practice during uncertain times It mirrors the enormous changes in investigation diagnosis and treatment that have occurred in recent years whilst maintaining the underlying principle that we do not treat diagnoses but rather we care for people affected by neurological disease Palliative Care for Chronic Cancer Patients in the Community Michael Silbermann, 2020-10-29 The new global cancer data suggests that the global burden has risen to 18.1 million new cases per year and 9.6 million cancer deaths per year A number of factors appear to be driving this increase in particular a growing and aging global population and an increase of exposure to cancer risk factors linked to social and economic development For rapidly growing economies the data suggests a shift from poverty or infection related cancers to those associated with lifestyles more typical in industrialized countries There is still large geographical diversity in cancer occurrence and variations in the magnitude and profile of the disease between and within world regions There are specific types of cancer that dominate globally lung female breast and colorectal cancer and the regional variations in common cancer types signal the extent to which societal economic and lifestyle changes interplay to differentially impact on the profile of this most complex group of diseases Unfortunately despite advances in cancer care a significant proportion of patients at home experience sub optimal outcomes Barriers to successful treatment outcomes include but are not limited to

access to oncologists in the primary health centers non adherence lack of experienced oncology and palliative care nurses in the community inadequate monitoring and the lack of training of family and pediatric physicians Telemedicine approaches including telephone triage education telemonitoring teleconsultation and status tracking through mobile applications have shown promise in further improving outcomes in particular for chronic cancer patients following their hospitalization Lessons can be learned from existing hospices in North America the United Kingdom Australia Centers of Excellence in African Uganda and modern community services in India Kerala An important goal of this book is to describe and encourage professionals to develop new community programs in palliative care which include training and empowering physicians and nurses in the community on the principles of palliative care The Middle East Cancer Consortium MECC together with the American Society of Clinical Oncology ASCO and the American Oncology Nursing Society ONS have conducted multiple courses ranging from basic palliative care to more specialized training in palliative care for multiple nationalities in Europe Asia and Africa Our experience clearly indicates that to promote such activities one needs strong leadership and confirmed political will to support the endeavor The new book will emphasize the importance of having a core of multiple stakeholders including community leaders government NGOs and media to be actively involved in advocating for the cause and generating public awareness This text will provide the reader with a comprehensive understanding of the outside of the hospital treatment of cancer patients by medical paramedical and volunteer personnel In doing so this text will encourage the creation of new palliative care services improving upon the existing ones and stimulate further research in this field Part 1 of the text will begin with an overview of the current state of affairs of services provided to cancer patients while being cared for by primary health centers It will also review the current literature regarding medical and psychological based therapy options in the community for cancer patients at different stages of their disease Part 2 will address the unique role of the community nurse within the framework of the multidisciplinary team treating the patient in the attempt to provide optimal evaluation and care in very challenging situations such as with terminal patients Part 3 will provide insightful models of this new discipline and serve as a valuable resource for physicians nurses social workers and others involved in the care of cancer patients The book will take a multidisciplinary approach integrating clinical and environmental data for practical management to enhance the efficacy of treatment while relieving suffering Part 4 will also discuss the application of modern technological approaches to track symptoms quality of life diet mobility duration of sleep and medication use including pain killers in chronic cancer patients in the community Part 5 of the book will also be devoted to modes of developing a collaborative program between governmental and non governmental organization sectors This includes volunteer workers in close collaboration with medical professionals for providing emotional and spiritual support nursing care nutritional support and empowering family caregivers Such a model makes palliative care in the community a people s movement thus transferring part of the responsibility and ownership to the community

BNA's Health Care Policy Report ,1995

Recent Advances in Therapeutic Drug Monitoring and Clinical Toxicology Seth Kwabena Amponsah, Yashwant V. Pathak, 2022-10-25 This book gives an overview of therapeutic drug monitoring TDM and its clinical application It also highlights recent advances in toxicological studies as they relate to therapeutic drug monitoring This is one of the few books available on the market that covers TDM Therapeutic drug monitoring TDM is a clinical decision making tool that enables dosage regimen adjustments based on clinical and laboratory measurements TDM not only involves the measuring of drug concentrations but also interpretation of the results There is a strong correlation between drug concentrations in body fluids and outcome than between dose and outcome The chapters include coverage of analytical techniques pharmacokinetics therapeutic indices artificial intelligence and recent advances in toxicological studies The book fills a gap in published literature and provides reliable information on Analytical techniques in TDM and clinical toxicology TDM and pharmacokinetic studies TDM of drugs with narrow therapeutic indices Artificial intelligence in TDM and clinical toxicology Future directions and challenges

Caring for the Seriously Ill Patient 2E Michael Macintosh, Tracey Moore, 1999-11-26 As more critically ill patients are cared for on acute general wards rather than in ICUs many nurses are having to cope with the particular problems of very sick patients without the specialist knowledge of an ICU trained nurse This book considers the key issues surrounding the critical patient's care in the acute general hospital The anatomy and physiology of each body system is explored looking at the major associated conditions and illnesses and how the patient is assessed and monitored

Standards for Nursing Care of the Critically Ill Sarah J. Sanford, Joanne Marilyn Disch, American Association of Critical-Care Nurses, 1989
