**Karl, Get Out of the Garden!** Anita Sanchez,2017-03-21 Do you know what a Solanum caule inerme herbaceo foliis pinnatis incisae racemis simplicibus is Carolus Karl Linnaeus started off as a curious child who loved exploring the garden Despite his intelligence and his mother s scoldings he was a poor student preferring to be outdoors with his beloved plants and bugs As he grew up Karl s love of nature led him to take on a seemingly impossible task to give a scientific name to every living thing on earth The result was the Linnaean system the basis for the classification system used by biologists around the world today Backyard sciences are brought to life in beautiful color Back matter includes more information about Linnaeus and scientific classification a classification chart a time line source notes resources for young readers and a bibliography it s a tomato A handsome introductory book on Linnaeus and his work Booklist starred review A good introduction to a man in a class by himself Kirkus Reviews Lends significant humanity to the naturalist Publisher s Weekly The biographical approach to a knotty scientific subject makes this a valuable addition to STEM and biography collections School Library Journal **What Linnaeus Saw** Karen Magnuson Beil,2019-10-01 Winner of the 2020 CBHL Award of Excellence in Children and Young Adult Literature The globetrotting naturalists of the eighteenth century were the geeks of their day innovators and explorers who lived at the intersection of science and commerce Foremost among them was Carl Linnaeus a radical thinker who revolutionized biology In What Linnaeus Saw Karen Magnuson Beil chronicles Linnaeus s life and career in readable relatable prose As a boy Linnaeus hated school and had little interest in taking up the religious profession his family had chosen Though he struggled through Latin and theology classes Linnaeus was an avid student of the natural world and explored the school s gardens and woods transfixed by the properties of different plants At twenty five on a solo expedition to the Scandinavian Mountains Linnaeus documented and described dozens of new species As a medical student in Holland he moved among leading scientific thinkers and had access to the best collections of plants and animals in Europe What Linnaeus found was a world with no consistent system for describing and naming living things a situation he methodically set about changing The Linnaean system for classifying plants and animals developed and refined over the course of his life is the foundation of modern scientific taxonomy and inspired and guided generations of scientists What Linnaeus Saw is rich with biographical anecdotes from his attempt to identify a mysterious animal given him by the king to successfully growing a rare and exotic banana plant in Amsterdam to debunking stories of dragons and phoenixes Thoroughly researched and generously illustrated it offers a vivid and insightful glimpse into the life of one of modern science s founding thinkers
