Comprehension Processes In Reading:

Comprehension Processes in Reading David A. Balota, G.B. Flores d'Arcais, Keith Rayner, 2012-11-12 Comprehension Processes in Reading addresses the interrelationship among several areas relevant to understanding how people comprehend text. The contributors focus on the on-line processes associated with text understanding rather than simply with the product of that comprehension: what people remember from reading. Presenting the latest theories and research findings from a distinguished group of contributors, *Comprehension Processes in Reading* is divided into four major sections. Each section concluding with a commentary chapter discusses a different aspect of reader understanding or dysfunction such as individual word comprehension, sentence parsing, text comprehension, and comprehension failures and dyslexia. **Teaching Reading**

Comprehension Processes Judith Westphal Irwin, 1991 M. CREATED **Basic Processes in Reading** David LaBerge, S. Jay Samuels, 2017-03-27 Originally published in 1977, this volume contains the most recent theoretical views and experimental findings by prominent psychologists at the time working in areas they considered to be most basic to the reading processes. The material will still be of value to people interested in applied and basic aspects of reading as well as those concerned with language processing and information processing in general. The volume divides conveniently into two areas: perception and comprehension. The initial chapters deal with the perceptual processes involved in reading. The second half of the volume delves into the area of comprehension. The interested reader will find a wide variety of topics covered in the volume that reflect the amazingly wide range of cognitive functions that are part of the reading process. *New Methods in Reading Comprehension Research* David E. Kieras, Marcel A. Just, 2018-04-17 Published in 1984, this volume presents methodologies for studying the ongoing psychological processes that occur as a person reads a text, as well as discussing the major findings that these methodologies have produced to provide a handbook of reading comprehension research techniques. Focusing on the comprehension processes that occur when a person is reading rather than the representation that remains after the text has been read, the methodologies use measures such as reading times that reflect ongoing processes rather than relying exclusively on conventional measures of memory performance such as recall. These methods make use of computer technology for rapid and flexible stimulus representation and data acquisition. This book will allow researchers and students to select appropriate methodologies to investigate a range of fascinating questions about reading comprehension. *Understanding Reading Comprehension* Wayne Tennynt, 2014-09-29 Can baboons read? That is the thought-provoking question that opens this wonderfully accessible book for trainee and practising primary school teachers to fully understand the process of reading comprehension. Comprehension is an essential component of learning to read, and a successful teacher of reading will have a portfolio of different strategies and approaches that take into account that children learn to read in different ways. This book supports the development of student and practising teachers' subject knowledge by providing detailed guidance into the reading comprehension process along with practical strategies and lesson ideas for use.
