Graduate Institute of Professional Psychology,2010 Historically divorce has been a complex issue Today divorce presents multiple challenges to the legal and mental health systems in our country Research has shown that divorce can have deleterious effects on parents and children and can hinder connections amongst family members Issues of child custody further complicate divorce The evolution of the court system from a focus on marriage and divorce inevitably led to the current attention given to one of the effects of marital dissolution child custody litigation It is the ongoing hope of the legal system that mental health professionals should find themselves in the unique position to use their expertise to help resolve the challenges of these disputes On the contrary however the entry of mental health professionals in this arena has created considerable controversy The issues that feed the controversy are multifaceted and include training knowledge and

competency the legitimacy of assessment ethical considerations and the need for scientific substantiation of current procedures policies and practices Although the resolution to these unresolved issues is currently out of reach improved education and training as well as cross disciplinary approaches to finding solutions that add confidence to the work offer hope for significant improvements in this field of work Ultimately this effort will add to the growing movement towards standardized practices that allow mental health professionals to meet practice standards maintain professional integrity and remain committed to ethical principles
