Complexities Beyond Nature And Nurture:

Complexities Susan McKinnon, Sydel Silverman, 2005-06 This book mobilizes experts from several fields of anthropology cultural archaeological linguistic and biological to offer a compelling challenge to the resurgence of reductive theories of human biological and social life It presents evidence to contest such theories and to provide a multifaceted account of the complexity and variability of the human condition Back cover [The Palgrave Handbook of Biology and Society](#) Maurizio Meloni, John Cromby, Des Fitzgerald, Stephanie Lloyd, 2017-10-27 This comprehensive handbook synthesizes the often fractured relationship between the study of biology and the study of society Bringing together a compelling array of interdisciplinary contributions the authors demonstrate how nuanced attention to both the biological and social sciences opens up novel perspectives upon some of the most significant sociological anthropological philosophical and biological questions of our era The six sections cover topics ranging from genomics and epigenetics to neuroscience and psychology to social epidemiology and medicine The authors collaboratively present state of the art research and perspectives in some of the most intriguing areas of what can be called biosocial and biocultural approaches demonstrating how quickly we are moving beyond the acrimonious debates that characterized the border between biology and society for most of the twentieth century This landmark volume will be an extremely valuable resource for scholars and practitioners in all areas of the social and biological sciences The chapter Ten Theses on the Subject of Biology and Politics Conceptual Methodological and Biopolitical Considerations is open access under a CC BY 4 0 license via link [springer.com](#) Versions of the chapters The Transcendence of the Social Scrutinizing the Epigenetics Revolution Species of Biocapital 2008 and Speciating Biocapital 2017 and Experimental Entanglements Social Science and Neuroscience Beyond Interdisciplinarity are available open access via third parties For further information please see license information in the chapters or on link [springer.com](#)

Anthropology and Nature Kirsten Hastrup, 2013-08-15 On the basis of empirical studies this book explores nature as an integral part of the social worlds conventionally studied by anthropologists The book may be read as a form of scholarly edgework resisting institutional divisions and conceptual routines in the interest of exploring new modalities of anthropological knowledge making The present interest in the natural world is partly a response to large scale natural disasters and global climate change and to a keen sense that nature matters matters to society at many levels ranging from the microbiological and genetic framing of reproduction over co species development to macro ecological changes of weather and climate Given that the human footprint is now conspicuous across the entire globe in the oceans as well as in the atmosphere it is difficult to claim that nature is what is given and permanent while people and societies are ephemeral and simply derivative features This implies that society matters to nature and some natural scientists look towards the social sciences for an understanding of how people think and how societies work The book thus opens up a space for new forms of reflection on how natures and societies are generated [Fragile Kinships](#) Kathryn E. Goldfarb, 2025-01-15 In *Fragile*

Kinships Kathryn E Goldfarb shows how child welfare systems do not always generate well being This is true across the world as it is in Japan Policymakers caregivers and people with experience in state care endeavor to imagine and implement child welfare systems that are genuinely supportive Yet despite these efforts social welfare systems too often produce people who are alone By centering relationality in theorizing social forms of care Fragile Kinships offers key insights into embodied and socioemotional well being Goldfarb analyzes both the feelings and effects of lacking kin and the transformative energy people invest in creating new forms of kinship and relatedness Fragile Kinships demonstrates why welfare systems must support relational well being In her contributions to anthropological theories of kinship embodiment and the field of Japanese studies Goldfarb also speaks to academics practitioners and policymakers in Japan and globally with ethnographically grounded perspectives suggesting ways that child welfare systems might truly achieve wellbeing

The Nature of Race Ann Morning,2011-06-24 What do Americans think race means What determines one s race appearance ancestry genes or culture How do education government and business influence our views on race To unravel these complex questions Ann Morning takes a close look at how scientists are influencing ideas about race through teaching and textbooks Drawing from in depth interviews with biologists anthropologists and undergraduates Morning explores different conceptions of race finding for example that while many sociologists now assume that race is a social invention or construct anthropologists and biologists are far from such a consensus She discusses powerful new genetic accounts of race and considers how corporations and the government use scientific research for example in designing DNA ancestry tests or census questionnaires in ways that often reinforce the idea that race is biologically determined Widening the debate about race beyond the pages of scholarly journals The Nature of Race dissects competing definitions in straightforward language to reveal the logic and assumptions underpinning today s claims about human difference
