The Social Conscience of the Early Victorians F. David Roberts,2002-08-07 In 1830 the dominant social outlook of the early Victorians was a paternalism that looked to property the Church and local Justices of the Peace to govern society and deal with its ills By 1860 however the dominant social outlook had become a vision of a laissez faire society that relied on economic laws self reliance and the vigorous philanthropy of voluntary societies This book describes and analyzes these changes which arose from the rapid growth of industry towns population and the middle and working classes Paternalism did not entirely fade away however just as a laissez faire vision had long antedated 1830 Both were part of a social conscience also defined by a revived philanthropy a new humanitarianism and a grudging acceptance of an expanded government all of which reflected a strong revival of religion as well as the growth of rationalism The new dominance of a laissez faire vision was dramatically evident in the triumph of political economy By 1860 only a few doubted the eternal verities of the economists voluminous writings Few also doubted the verities of those who preached self reliance who supported the New Poor Law s severity to persons who were not self reliant and who inspired education measures to promote that indispensable virtue If economic laws and self reliance failed to prevent distress the philanthropists and voluntary societies would step in Such a vision proved far more buoyant and effective than a paternalism whose narrow and rural Anglican base made it unable to cope with the downside of an industrial urban Britain But the vision of a laissez faire society was not without its flaws Its harmonious economic laws and its hope in self reliance did not prevent gross exploitation and acute distress and however beneficent were its philanthropists they fell far short of mitigating these evils This vision also found a rival in an expanded government Two powerful ideas the idea of a paternal government and the idea of a utilitarian state helped create the expansion of government services A reluctant belief in governmental power thus joined the many other ideas that defined the Victorian s social conscience *The Building Society Promise* Antoninus Samy,2016 *The Building Society Promise* explores the accessibility of the early building society movement to working class households before the Second World War The study examines the historical records of building societies which existed in the past and reconstructs their mortgage portfolios to investigate the kinds of people that were buying houses with the help of building society finance during this

period Antoninus Samy shows how the accessibility of different building societies primarily depended upon the how individual societies were designed to do business which in turn also affected their efficiency and stability Societies that were small and highly localized or large societies that had agency networks that were closely knit with the communities they served were more likely to be accessible efficient and stable than larger societies that operated no differently than impersonal corporate banks

The Routledge Handbook of Architecture, Urban Space and Politics, Volume I Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license
