Keywords for Marxist Art History Today Larne Abse Gogarty, Andrew Hemingway, 2020-05-11 The mood of systemic crisis that has marked the early 21st century has been accompanied by an upsurge in Marxist thought in a whole range of domains and extends to art history In this volume 19 scholars from different generations different national contexts and with different relationships to Marxism reflect on the status of 18 keywords with special pertinence to Marxist art historical inquiry today Starting point of the researches was the knowledge that while certain keywords have been crucial to recent developments in Marxist art history and cultural theory more broadly others seem to have slipped out of view The scholars are not so much interested in the historical semantics of words although that plays some role in the essays as in the present state of Marxist art history

Art History Now Geraldine A. Johnson, 2025-12-29 This volume presents definitive essays by internationally renowned experts and innovative younger scholars on the wide range of approaches used by art historians past and present to analyze images objects buildings and performances It provides critical considerations of key methodologies from formalism and iconography to social history and psychoanalytic approaches It foregrounds fundamental concepts from the artist the beholder and the frame to museums canons and periodization At the same time it broadens art itself as a category by considering photographs digital media performance architecture and visual culture more generally The chapters also explore new approaches and new points of view that have expanded Art History's remit in exciting ways in recent years by addressing growing interest in race ethnicity and the legacies of colonialism gender identity and sexuality ecocritical approaches to making and consuming art materiality and the senses digitally informed methods the nascent field of Disability Studies and scientific research on vision and on the technical analysis of works of art This comprehensive collection will be indispensable for students and scholars of Art History as well as for readers coming from other disciplines who are seeking fresh approaches to visual and material culture
