Art Of Military Deception:

The Art and Science of Military Deception Hy Rothstein, Barton Whaley, 2013-09-01 It is said that deception among people in a civilized society is something to be loathed even though it seems to be part of human nature but deception in war is a virtue Properly designed and executed stratagems reduce the horrific costs of war This book is a comprehensive collection of classic articles on deception hand picked and expertly introduced by well known experts on military deception The purpose of this book is to set in motion a renaissance for using deception as an instrument of statecraft The various sections are designed to cumulatively provide sufficient breadth and depth on the subject to satisfy both the novice as well as the expert Packed with expert commentary interesting background information and original readings this book provides the reader with sufficient knowledge to pursue General Eisenhower s vision for the proper role of deception in support of the national interest [The Art of Military Deception](#) Mark LLOYD, 1996 **Deception in War** Jon Latimer, 2003-04-29 From

the Trojan Horse to Gulf War subterfuge this far reaching military history examines the importance and ingenuity of wartime deception campaigns The art of military deception is as old as the art of war This fascinating account of the practice draws on conflicts from around the world and across millennia The examples stretch from the very beginnings of recorded military history Pharaoh Ramses II s campaign against the Hittites in 1294 B C to modern times when technology has placed a stunning array of devices into the arsenals of military commanders Military historians often underestimate the importance of deception in warfare This book is the first to fully describe its value Jon Latimer demonstrates how simple tricks have been devastatingly effective He also explores how technology has increased the range and subtlety of what is possible including bogus radio traffic virtual images even false smells Deception in War includes examples from land sea and air to show how great commanders have always had as Winston Churchill put it that indispensable element of legerdemain an original and sinister touch which leaves the enemy puzzled as well as beaten **The Art and Science of Military Deception** , 2013

Practise to Deceive Estate of Barton Whaley,2016-01-15 Written by the undisputed dean of U S denial and deception experts Practise to Deceive is the most in depth look at deception as a military strategy Barton Whaley knew the history of denial and deception across time disciplines and culture He was the foremost authority on the intricacies of denial and deception strategy and tactics For Whaley deception was a mind game requiring imagination deep critical thought a profound understanding of the enemy as well as one s self a variation of Sun Tzu and patience and fortitude This book presents 88 vividly descriptive case studies to serve as a handbook for intelligence and military professionals In Whaley s analysis variations in guilefulness between opposing individuals or groups can be crucial in deciding who achieves victory in combat Military Deception and Operational Art Douglas V. Smith,1992 **Military Deception and Operational Art** Douglas V. Smith,Naval War College (U.S.),Naval War College (U.S.). Center for Naval Warfare Studies. Strategic Research Department,1992 *Second World War Deception* Donald J. Bacon,2004-10-01 Second World War history offers the military strategist a cornucopia of lessons learned on how to apply the art of military deception This paper analyzed six Allied deception operations to identify the fundamental reasons why Allied deception efforts were the most successful in history The six deception operations reviewed were Barclay Cockade and Bodyguard as well as the Soviet deception operations at Stalingrad Kursk and White Russia A critical analysis of these six operations identified seven major factors that made Allied deception efforts extremely effective These seven factors were that the Allies controlled all key channels of information had great intelligence feedback on their deception operations had high level and centralized control over deception planning practiced sound deception techniques subordinated deception to strategic and operational objectives maintained adequate secrecy and provided sufficient time for deception execution These factors are relevant for today s operations and should be

imbedded within US doctrine **Weaving the Tangled Web** Army University Press, Christopher M. Rein, 2018-09 Volume 1 Weaving the Tangled Web Military Deception in Large Scale Combat Operations surveys twelve cases of MILDEC from World War I through Desert Storm focusing on how armies have successfully used preconceptions to either immobilize an opponent or force the expenditure of energy in unproductive directions The case studies span the major wars of the twentieth century from the perspectives of several great powers and offer both a primer for planners of military deception and a caution for all military personnel to remain constantly on guard for practitioners of this ancient art *The Art of Deception in Warfare* Michael Dewar, 1989-01-01 Looks at the theory and practices of military deception camouflage concealment propaganda and gives examples of these from history *Second World War Deception. Lessons Learned for Today's Joint Planner* , 1998 Second World War history offers the military strategist a cornucopia of lessons learned on how to apply the art of military deception This paper analyzed six Allied deception operations to identify the fundamental reasons why Allied deception efforts were the most successful in history The six deception operations reviewed were Barclay Cockade and Bodyguard as well as the Soviet deception operations at Stalingrad Kursk and White Russia A critical analysis of these six operations identified seven major factors that made Allied deception efforts extremely effective These seven factors were that the Allies controlled all key channels of information had great intelligence feedback on their deception operations had high level and centralized control over deception planning practiced sound deception techniques subordinated deception to strategic and operational objectives maintained adequate secrecy and provided sufficient time for deception execution These factors are relevant for today s operations and should be imbedded within U S doctrine This study then examined Joint Publication 3 58 Joint Doctrine for Military Deception and determined it could better incorporate the lessons learned from World War II Current joint doctrine could be improved by underscoring the contribution that deception provides to surprise the importance of integrating deception within all three levels of war and the importance of exploiting an adversary s preexisting beliefs when creating a deception story Applying these World War II lessons will bolster U S deception capabilities **From the Knowledge of Understanding to Military Deception** , 2008 Military deception is as old as war itself and it adheres to a logical process This monograph explores how an increased understanding of pattern recognition as part of human decision making can enhance the effectiveness of military deception operations Before one can exercise the art of military deception one must understand the science of it The science of military deception is revealed in the way that people make decisions One of the prerequisites of decision making is that one needs to have knowledge about the issue upon which one is about to decide This makes it necessary for one to also investigate the subject and theory of knowledge This exploration leads the author to ask three questions First how do we acquire knowledge When we have acquired knowledge how do we retain it Finally how do we use knowledge This last question leads one back to decision making The author then sought to establish a causal relationship between pattern recognition and decision making Through experimental research he tried to cause a

decrease in ambiguity and thereby facilitate the erroneous orientation of the decision maker He expected that this would make the decision maker decisive certain and wrong However according to statistics the experiment did not show conclusive evidence that previous experiences influence people in making decisions But there is strong evidence that indicates a relationship between experience and decision making Further research with a larger sample might show a significant statistical relationship To let military practitioners rise above the subconscious level of the science of military deception it is necessary to provide them with education and training The subject of military deception should be introduced into military doctrine and into the curricula of military education
