Art Therapy With Offenders:

Art Therapy with Offenders Marian Liebmann, 1994 This collection of work on art therapy focuses exclusively on offenders It describes how the use of art therapy can contribute to an understanding of offenders and to their own understanding of themselves *Art Therapy with Young Offenders* Linda Kearney, 2002 *Art Therapy Practices for Resilient Youth* Marygrace Berberian, Benjamin Davis, 2019-11-28 *Art Therapy Practices for Resilient Youth* highlights the paradigm shift to treating children and adolescents as at promise rather than at risk By utilizing a strength based model that moves in opposition to pathology this volume presents a client allied modality wherein youth are given the opportunity to express emotions that can be difficult to convey using words Working internationally with diverse groups of young people grappling with various forms of trauma 30 contributing therapists share their processes informed by current understandings of neurobiology attachment theory and developmental psychology In addition to guiding principles and real world examples also included are practical directives strategies and applications Together this compilation highlights the promise of healing through the creative arts in the face of oppression *An Exploration of the Ways in which Art Therapy Complements and Enhances Cognitive-behavior Therapies in the Rehabilitation of Violent Offenders* Sarah Lyn Little, 2007 Violent crime is a serious problem in North America Most violent offenders have been victims of violence themselves predisposing them to inflict harm upon others The mental health needs of these individuals are immense helping them restore a sense of humanity and decrease their likelihood of recidivism is a challenging and important goal As such rehabilitation programs for this population must be carefully considered The effectiveness of cognitive behavior therapies CBT is well established within prisons Although it is a less established approach within corrections art therapy has also been shown as an effective intervention in the rehabilitation of violent offenders There are art therapists who integrate CBT approaches in their practice however these two therapeutic treatment models have traditionally been perceived as somewhat antithetical This research seeks to explore the links between these approaches illustrating the ways in which art therapy facilitates and enhances the goals of CBT The aim of this study is to contribute to an awareness regarding the importance of offering the most effective balanced and rich treatment possible to violent offenders in order to prevent violent behavior *Feminist Approaches to Art Therapy* Susan Hogan, 1997 A comprehensive survey of women s issues within art therapy Leading international practitioners discuss topics such as assertiveness empowerment sexuality and childbirth as well as issues around class race and age *Arts Therapies and Sexual Offending* Marian Liebmann, Simon Hastilow, 2021-01-21 A resource for arts therapists and other clinicians on working with people who have committed sexual offences There is a strong focus on the value of establishing a therapeutic relationship involving non verbal media as a cornerstone drawing upon current research and practice Emphasis is placed on working with transference and counter transference being trauma informed and making use of effective supervision This group of offenders can benefit hugely from the provision of arts therapies and this book provides

valuable experiences of working with people who have committed sexual offences *Exploring High-risk Offender Treatment and the Role of Music Therapy* Louise Sicard, 2021-07-05 Exploring High risk Offender Treatment and the Role of Music Therapy explores the treatment delivered to high risk offenders with complex needs focusing on sex and violent offenders The book advocates for the further use of less traditional and creative therapies in particular music therapy The higher the risk the greater the needs Offenders with complex needs have a range of factors impacting their abilities and well being including mental health and learning disorders Importantly high risk offenders commonly present with complex needs and therefore require treatment that is highly responsive Guiding this book is the existing literature and qualitative research conducted by the author that sought to gain the perspectives and experiences of practitioners in the field This included 38 interviews with those that deliver treatment to high risk offenders and music therapy This book examines the components of high risk offender treatment highlighting the effective elements and the limitations found within the literature and from the perspective of interviewed practitioners Offering insight into less traditional therapies the book presents literature surrounding mindfulness psychodrama and art therapy for high risk offenders It is argued that there has been a recent shift towards a creative corrections approach where less traditional therapies are gaining recognition within offender treatment as they offer unique and supportive benefits to traditional treatment This book focuses on examining the role of music therapy for high risk offenders mainly through a critical discussion on the relevant literature and qualitative practitioner data Advocating the further implementation of creative corrections approaches this book will be of great interest to academics and researchers within the fields of offender treatment and penology as well as forensic psychologists and those studying or practicing music therapy *Art Therapy with Offenders: A Special Focus on Male Sex Offender Treatment* Courtney J Brensinger, 2020 **Art Therapy with Mentally Ill Offenders Serving Long-term Sentences** Christina Palaschak, 2004 *Using Art Therapy with Aboriginal Offenders* Diane Gattermann, 1999 There is a sharp contrast between the Euro American and Aboriginal American conceptualisations of criminality and its consequent treatment While the Euro American paradigm views criminality as a pathology of the individual First Nations peoples view it as a spiritual emotional mental and physical imbalance that stems from and ultimately has repercussions for outside sources Because of its holistic approach emphasis on non verbal symbolism and non threatening use of art as a therapeutic milieu art therapy proves to be an efficacious transcultural tool in the treatment of adult offenders at a correctional institution for Aboriginal men Review and discussion of Euro American and Aboriginal views of criminality and treatment is followed by a brief discussion of the historic and political context in which First Nations peoples are situated and which must be understood in order to fully grasp the basis for the contemporary social emotional and psychological conditions of Aboriginal individuals This is followed by two case studies which exemplify the use of art therapy in this context *Art Therapy with a Juvenile Sex Offender* Megan E. Diffendal, 2007 Juvenile sex offenders are a challenging population and require treatment designed to address and work

through factors relating to their sexual offending behaviors often requiring a research based treatment program Art therapy is one treatment module that is effective when working with juvenile sex offenders In the following the author compares experiences from her art therapy internship and Galley s 2007 research based program This paper includes a review of pertinent literature and an examination of Galley s 2007 treatment program and art therapy treatment options in particular
