*The Creative Engineer* Winston Kock, 2012-12-06 The economic growth and strength of a nation are directly related to the ability of its people to make discoveries and their ability to transform these discoveries into useful products Ninety percent of the increase in output per capita in the United States from 1909 to 1949 has been held to be attributable to technological advances In this book we examine the ways in which a number of important new technologies came into being and review the characteristic traits of inventors who create new technologies Ways are suggested that could enable young and old alike to become more creative and the various benefits they can thereby reap are also discussed A high level of creativity is an important asset for a nation and therefore a knowledge of ways to increase inventiveness can be of great value University of Cincinnati President Warren Bennis has noted that creativity is something most of us seem to lose or let atrophy as we leave childhood To rediscover it he continues we must find ways of re creating our sense of wondering why of heightening even altering our consciousness Thus the earlier in life one seeks to enhance his creativity the more successful the results are likely to be Making Art Work W. Patrick McCray, 2020-10-20 The creative collaborations of engineers artists scientists and curators over the past fifty years Artwork as opposed to experiment Engineer versus artist We often see two different cultural realms separated by impervious walls But some fifty years ago the borders between technology and art began to be breached In this book W Patrick McCray shows how in this era artists eagerly collaborated with engineers and scientists to explore new technologies and create visually and sonically compelling multimedia works This art emerged from corporate laboratories artists studios publishing houses art galleries and university campuses Many of the biggest stars of the art world Robert Rauschenberg Yvonne Rainer Andy Warhol Carolee Schneemann and John Cage participated but the technologists who contributed essential expertise and aesthetic input often went unrecognized Coming from diverse personal backgrounds this roster of engineers and scientists includes Frank J Malina the American rocket pioneer turned kinetic artist who launched the art science journal Leonardo and Swedish born engineer Billy Kliver who established the group Experiments in Art and Technology E A T At schools ranging from MIT to Caltech engineers engaged with such figures as artist Gyorgy Kepes and celebrity curator Maurice Tuchman Today we are in the midst of a new surge of corporate and academic promotion of projects and programs combining art technology and science Making Art Work reveals how artists and

technologists have continually constructed new communities in which they exercise imagination display creative expertise and pursue commercial innovation
