Art of the Modern Age Jean-Marie Schaeffer, 2023-09-26 This is a sweeping and provocative work of aesthetic theory a trenchant critique of the philosophy of art as it developed from the eighteenth century to the early twentieth century combined with a carefully reasoned plea for a new and more flexible approach to art Jean Marie Schaeffer one of France s leading aestheticians explores the writings of Kant Schlegel Novalis Hegel Schopenhauer Nietzsche and Heidegger to show that these diverse thinkers shared a common approach to art which he calls the speculative theory According to this theory art offers a special kind of intuitive quasi mystical knowledge radically different from the rational knowledge acquired by science This view encouraged theorists to consider artistic geniuses the high priests of humanity creators of works that reveal the invisible essence of the world Philosophers came to regard inexpressibility as the aim of art refused to consider second tier creations genuine art and helped to create conditions in which the genius was expected to shock puzzle and mystify the public Schaeffer shows that this speculative theory helped give birth to romanticism modernism and the avant garde and paved the way for an unfortunate divorce between art and enjoyment between high art and popular art and between artists and their public Rejecting the speculative approach Schaeffer concludes by defending a more tolerant theory of art that gives pleasure its due includes popular art tolerates less successful works and accounts for personal tastes A remarkable work Schaeffer s writing is governed by the ideals of clarity and consequence the ideas of logic truth and evidence Schaeffer is so precise and unrelenting a philosophical critic that one wonders how some of the philosophies he anatomizes here can possibly survive the operation From the foreword by Arthur C Danto      **Politics and Heidegger's**

**Concept of Thinking in Contemporary Art** Louise Carrie Wales, 2021-09-16 Responding to Heidegger s stark warnings concerning the essence of technology this book demonstrates art s capacity to emancipate the life world from globalized technological enframing Louise Carrie Wales presents the work of five contemporary artists Martha Rosler Christian Boltanski Krzysztof Wodiczko and collaborators Noorafshan Mirza and Brad Butler who challenge our thinking and compel a dramatic re positioning of social norms and hidden beliefs The through line is rooted in Heidegger s question posed at the conclusion of his technology essay as understood through artworks that provides a counter to enframing while using

increasingly sophisticated technological methods The themes are political in nature and continue to have profound resonance in today's geopolitical climate The book will be of interest to scholars working in art history aesthetics philosophy and visual culture
