Island Tourism Sustainability and Resiliency Michelle McLeod,Rachel Dodds,Richard Butler,2022-04-27 This book provides comprehensive insight into the challenges faced by island tourism destinations and theoretical and practical paths for built in sustainability and resiliency It explores Island Tourism Resilience within the context of Lifecycles System Decline

and Resilience Tourism is a key activity for many islands and some depend on the tourism sector as a main economic activity. An exploration of islands across the globe that addresses substantial matters of ongoing sustainability and resiliency is ever important. An array of challenges including natural disasters, climate change, economic and political crises among others has been addressed in the book with additional areas such as overtourism and COVID 19 included at the conclusion. This volume is essential reading for academics, tourism planners and policy makers seeking to develop sustainable and resilient island destinations. With a new Foreword, Introduction, Conclusion and Afterword, the chapters in this book were originally published in the journal *Tourism Geographies*. [American Architect and Building News](#), 1876. [Professionalization in the Creative Sector](#) Margaret J. Wyszomirski, WoongJo Chang, 2023-10-26. This book seeks to better understand the processes and influences that have driven professionalization in the arts. It develops an analytical framework that examines how processes of professionalization that typically influence and shape work conditions and occupational status are in the creative sector, augmented by atypical worker efforts and choices to self-structure their protean careers. The book brings together a collection of works that explore the specific trajectories of professionalization in a variety of creative occupations as well as the formative processes that work across many creative occupations. In particular, the scholarship presented focuses on the interaction of three key variables: field growth and institutionalization, mutual benefit organization within fields and occupations, and the intervention of cultural policy to validate and foster professional support structures. In the broader context of expanding globalization, growing awareness of diversity and tectonic shifts in technology, this volume unveils research-based implications for cultural policy, cultural workers and cultural organizations. This book will be of interest to researchers, creative professionals as well as undergraduate and graduate level students in the fields of arts, administration and culture. **F & S Index United States Annual**, 2007. [Performing Media Activism in the Digital Age](#) Neil Alperstein, 2021-07-31. *Performing Media Activism in the Digital Age* breaks new ground by conceptualizing activism as a performance extending beyond public space and the moment of public gatherings to consider the more extended view of social or political movements as mediated social connections. The book utilizes primary data extracted from social media platforms by applying a social network analysis (SNA) approach to the people, organizations and media that are trying to advance their particular agendas with an eye toward a better understanding of the ways in which social movements operate in a networked society. The goal of social network analysis is to identify social structures within a movement such as communities or clusters and it seeks to locate influence within those structures. Social network analysis as applied to media activism represents an interdisciplinary field that encompasses social psychology, sociology as well as graph theory which should suggest this book will be of interest to scholars and students in these and related fields. In the digital age, social network analysis represents a paradigm shift as analytical and data visualization tools can be applied in an interdisciplinary manner. By combining data science and sociology or cultural anthropology, one has the means to visualize networks of

individuals and organizations engaged in a social movement to see how movements are organized structured into communities clusters and niches and to visualize power structures within social movements to see who is influencing a network over extended periods of time
