Alternative Protein Source For A Sustainable And Healthy Nutrition Carla Cavallo, Kathleen L. Hefferon, 2024-08-01 Global socioeconomic systems and climate change exacerbate disparities that leave a huge proportion of the human population malnourished. This condition will be further worsened by intensive food production like livestock that produces affordable protein but contribute to increasing greenhouse gases making conventional food sources such as animal livestock unsustainable at global scales in a vicious cycle. Thus food systems have come under pressure to meet global food demands whilst having to meet economic and ecological targets. *Handbook on the Business of Sustainability* Gerard George, Martine R. Haas, Havovi Joshi, Anita M. McGahan, Paul Tracey, 2022-02-11 This ground breaking Handbook uniquely focuses on the business of sustainability offering a fresh insight and practical solutions to the challenges that businesses face in making human activity sustainable. It is organized into four distinctive themes that cut across levels of analysis and illustrate a rich set of solution contexts that will guide future research.

Collective Choice Jac C. Heckelman, Dennis Coates, 2013-06-29 Mancur Olson wrote important books in the area of Collective Choice and is considered one of the founding fathers of Public Choice as a field of economics. The chapters in this volume cover three main areas of Olson's life work: Collective Action, Institutional Sclerosis, and Market Augmenting Government. Some chapters directly assess Olson's contributions focusing on distinguishing what was original in his works from what was already in the literature and gauging his impact on the fields of public economics and economic history. Other chapters present new tests and frequently extend his work. Each of the chapters is a new piece of scholarship inspired by and intended to honor Mancur Olson and extend his influence to another generation of Collective Choice scholars and researchers.

Evaluation for Participation and Sustainability in Planning Angela Hull, E.R. Alexander, Abdul Khakee, Johan Woltjer, 2012-03-29 Planning evaluation is required to establish the success of planning interventions both of physical developments and new approaches. Yet this should not be a task undertaken purely by professionals without participation by those affected by the process and outcomes of the projects. This book provides case studies and advice on how to balance conservation with economic growth, the cost effectiveness of plans alongside the effects upon the community and the importance of engaging with all stakeholders involved in a project. Practical aspects of the evaluation process covered include how evaluation is used in planning, introducing new kinds of information or criteria, alternative ways of collecting/presenting information, how strategic planning objectives are implemented in local practice. International contributors provide empirical studies and cases of application which are of practical value to those involved in the evaluation of planning. The book concludes by offering a new paradigm: a locally oriented, context specific, participatory and multi-disciplinary approach to planning evaluation.
