Accounting Reform in Transition and Developing Economies Robert W. McGee,2008-11-16 Much has been written about the economic and political problems of countries that are in the process of changing from centrally planned systems to market systems Most studies have focused on the economic legal political and sociological problems these economies have had to face during the transition period However not much has been written about the dramatic changes that have to be made to the accounting and financial system of a transition economy This book was written to help fill that gap Accounting Reform in

Transition and Developing Economies is the fourth in a series to examine accounting and financial system reform in transition and developing economies. The first volume used Russia as a case study. In addition to covering the new Sarbanes Oxley legislation, SEC rules and regulations and corporate governance standards promulgated by the Independence Standards Board and the AICPA at institutions such as New York Stock Exchange, NASDAQ and the American Stock Exchange, the *Financial Reporting Handbook* tackles important underlying themes such as the centrality of the audit committee, the individual responsibility of executives and the integrity of the outside auditor. Visualising Intangibles: Measuring and Reporting in the Knowledge Economy Stefano Zambon, 2016-02-11. Despite the now widely recognized importance of intangible assets and intellectual capital, they still appear to be poorly understood by both academics and practitioners. Indeed, the necessity for adopting a fresh approach to their reporting, measurement and management is today generally clear and accepted. This book gives room to new perspectives which broaden the scope and depth of the investigation whilst also opening up innovative methods and opportunities for practice.

The Greening of European Business under EU Law Beate Sjøfjell, Anja Wiesbrock, 2014-11-13. The relationship between environmentally sustainable development and company and business law has emerged in recent years as a matter of major concern for many scholars, policy makers, businesses and nongovernmental organisations. This book offers a conceptual analysis of the principles of sustainable development and environmental integration in the EU legal system. It particularly focuses on Article 11 of the Treaty on the Functioning of the European Union (TFEU) which states that EU activities must integrate environmental protection requirements and emphasise the promotion of sustainable development. The book gives an overview of the role played by the environmental integration principle in EU law, both at the level of European legislation and at the level of Member State practice. Contributors to the volume identify and analyse the main legal issues related to the importance of Article 11 TFEU in various policy areas of EU law affecting European businesses, such as company law, insurance and state aid. In drawing together these strands, the book sets out the requirements of environmental integration and examines its impact on the regulation of business in the EU. The book will be of great use and interest to students and researchers of business law, environment law and EU law.

Whitaker's Books in Print, 1998. **European financial regulation and supervision and the onslaught of the financial crisis** Veronica Hagenfeldt, 2011-04-01. Scientific Essay from the year 2009 in the subject Law, European and International Law, Intellectual Properties, grade Distinction, University of

Edinburgh School of Law course Regulatory governance in the European Union language English abstract The aim of this paper is threefold first to establish how the regulatory and supervisory architecture has evolved in Europe over the last decade second to determine how the shortcomings of the present system affected the onslaught of the financial crisis in Europe and lastly to evaluate whether the proposed regulatory and supervisory reforms are likely to successfully repair these weaknesses Part I identifies that the single market objective combined with the significant integration of European financial services provided the major impetus for bringing about reform to the regulatory and supervisory architecture of Europe By investigating the Financial Services Action Plan FSAP and the implementation of the Lamfalussy Process this paper illustrates that the member states and the EU institutions sought to achieve a flexible regulatory and supervisory structure marked by cooperation and convergence towards common standards However despite the commendable progress made Part II shows that the regulatory and supervisory system has not kept pace with the financial integration and that the current crisis revealed substantial inadequacies of the present system This paper will demonstrate that the weaknesses in the European financial regulatory and supervisory architecture acted both as contributing causes of the crisis and as exacerbating factors In particular the essay identifies three such shortcomings that aggravated the crisis namely that the current system caused a breakdown in member state cooperation and coordination that it is marked by inconsistency and that it lacks a sufficiently developed EU dimension Lastly Part III investigates the proposed regulatory and supervisory reforms that the de Larosi Report brought forth The Report makes recommendations for extensive reform and it is submitted that not only are these reforms likely to cure many of the current cooperation and convergence problems but they would also equip Europe with a partially centralised supervisory structure that would help prevent future crises of similar cataclysmic proportions
