Access Principle The Case For Open Access To Research Scholarship:

The Access Principle John Willinsky, 2006 Questions about access to scholarship have always raged The great libraries of the past stood as arguments for increasing access John Willinsky describes the latest chapter in this ongoing story online open access publishing by scholarly journals and makes a case for open access as a public good **The Bloomsbury Handbook to the Digital Humanities** James O'Sullivan, 2022-11-03 This book is a future focused collection of essays on the digital humanities from a selection of leading international scholars and practitioners **Copyright's Broken Promise** John Willinsky, 2022-12-06 A comprehensive proposal for reforming copyright law to ensure sustainable public access to research and scholarship Open access is widely supported by researchers librarians scholarly societies and research funders as well as large and small publishers Yet despite this support and the pandemic's demonstration of the importance of open access for scientific progress the scholarly publishing market is failing to deliver open access quickly enough In *Copyright's Broken Promise* John Willinsky presents the case for reforming copyright law so that it supports rather than impedes public access to research and scholarship He draws on the legal strategy of statutory licensing to set out the terms and structures by which the Copyright Act could ensure that publishers are fairly compensated for providing immediate open access What sets Willinsky's analysis apart is its focus on the current state of scholarly publishing Because copyright offers so little legal support for moving publishing to open access though it is best for science he says it is time to stop regarding the Copyright Act as a law of nature that can only be circumvented contravened or temporarily set aside Specifically he proposes that the Copyright Act add a new category of work called research publications which would be subject to statutory licensing This would allow publishers to receive royalty payments from the principal institutional users universities industry R D research institutes and so on and sponsors of the work foundations and government agencies while providing immediate open access

The Intellectual Properties of Learning John Willinsky, 2018-01-02 Providing a sweeping millennium plus history of the learned book in the West John Willinsky puts current debates over intellectual property into context asking what it is about learning that helped to create the concept even as it gave the products of knowledge a different legal and economic standing than other sorts of property Willinsky begins with Saint Jerome in the fifth century then traces the evolution of reading writing and editing practices in monasteries schools universities and among independent scholars through the medieval period and into the Renaissance He delves into the influx of Islamic learning and the rediscovery of classical texts the dissolution of the monasteries and the founding of the Bodleian Library before finally arriving at John Locke whose influential lobbying helped bring about the first copyright law the Statute of Anne of 1710 Willinsky's bravura tour through this history shows that learning gave rise to our idea of intellectual property while remaining distinct from if not wholly uncompromised by the commercial economy that this concept inspired making it clear that today's push for marketable intellectual property threatens the very nature of the quest for learning on which it rests **Computers and Society** Ronald M. Baecker, 2019

Computers and Society explores the history and impact of modern technology on everyday human life considering its benefits drawbacks and repercussions Particular attention is paid to new developments in artificial intelligence and machine learning and the issues that have arisen from our complex relationship with AI *Creating a Legal Framework for Copyright Management of Open Access Within the Australian Academic and Research Sector* Brian F. Fitzgerald,2006 The Report investigates a legal framework that supports open access to Australian academic and research outputs such as datasets articles and electronic theses and dissertations The Report explains that with the rise of networked digital technologies our knowledge landscape and innovation system is increasingly reliant on best practice copyright management strategies
