**Accounting for Feminism** Kathryn Haynes,2025 Although gender challenges in accounting are widely acknowledged research often addresses the relational position of men and women in relation to various issues without necessarily challenging the underlying structures and social constructions of gender In contrast this book takes a much more overtly feminist position informed by feminist theory feminist methodology and feminist activism to challenge these constructs and resulting inequalities The book addresses contemporary global feminisms and their potential emancipatory implications for accounting as a profession and as a tool or technology It explores feminist theorisations of accounting offering new insights into their relevance and provides a rich theoretical and practical resource to advance knowledge in the discipline and stimulate further interdisciplinary research Rather than being issue driven with chapters organised to address particular concerns that relate to gender and accounting such as parenthood career progression accountability etc the structure of this book is such that the feminist theoretical position is the starting point for each chapter The book highlights the range of ways that feminism in its various forms and from numerous theoretical perspectives can contribute to an understanding of the gender challenges occurring within accounting and the ways of overcoming them In this way the book provides an integrated discussion of theory challenge and potential overcoming that will appeal to readers whatever their orientation to feminism or which of the gender challenges within the accounting discipline they are interested in
