Bonissone, Luis Magdalena, Janusz Kacprzyk, 2012-01-13 The unexpected and premature passing away of Professor Ebrahim H Abe Mamdani on January 22 2010 was a big shock to the scientific community to all his friends and colleagues around the world and to his close relatives Professor Mamdani was a remarkable figure in the academic world as he contributed to so many areas of science and technology Of great relevance are his latest thoughts and ideas on the study of language and its handling by computers The fuzzy logic community is particularly indebted to Abe Mamdani 1941 2010 who in 1975 in his famous paper An Experiment in Linguistic Synthesis with a Fuzzy Logic Controller jointly written with his student Sedrak Assilian introduced the novel idea of fuzzy control This was an elegant engineering approach to the modeling and control of complex processes for which mathematical models were unknown or too difficult to build yet they could effectively and efficiently be controlled by human operators This ground breaking idea has found innumerable applications and can be considered as one of the main factors for the proliferation and adoption of fuzzy logic technology Professor Mamdani's own life and vital experience are illustrative of his never surrendering attitude while facing adversaries which is normal for a person proposing any novel solution and represent a great example for everybody His subtle sense of humor his joy for life and his will to critically help people especially young people were characteristics deeply appreciated by all the people who enjoyed and benefited from his friendship and advice This book constitutes a posthumous homage to Abe Mamdani It is a collection of original papers related in some way to his works ideas and vision and especially written by researchers directly acquainted with him or with his work The underlying goal of this book will be fulfilled if in the very spirit of Mamdani's legacy the papers will trigger a scientific or philosophical debate on the issues covered or contribute to a cross fertilization of ideas in the various fields **Advances in Computational Intelligence, Part I** Salvatore Greco, Bernadette Bouchon-Meunier, Giulianella Coletti, Mario

**Human-Centric Information Processing Through Granular Modelling** Andrzej Bargiela, Witold Pedrycz, 2009-02-26 Information granules and their processing permeate a way in which we perceive the world carryout processing at the conceptual abstract level and communicate our findings to the surrounding environment The importance of information granulation becomes even more apparent when we are faced with a rapidly growing flood of data become challenged to make decisions in complex data settings and are required to appreciate the context from which the data is derived Human centricity of systems that claim to be intelligent and the granular computing come hand in hand It is not surprising at all to witness that the paradigm of Granular Computing has started to gain visibility and continues along this path by gathering interest from the circles of academics and practitioners It is quite remarkable that the spectrum of application and research areas that have adopted information granulation as a successful strategy for dealing with information complexity covers such diverse fields as bioinformatics image understanding environmental monitoring urban sustainability to mention few most visible in the literature Undoubtedly there are two important aspects of Granular Computing that are worth stressing First there are several formalisms in which information granules are articulated so be intervals sets fuzzy sets rough sets soft sets approximate sets near sets and alike They are complementary and each of them offers some interesting views at the complexity of the world and cyberspace
