Achieving Accountability:

Innovating Democracy Robert E. Goodin, 2008-07-10 Instead of merely casting the occasional ballot deliberative democrats want citizens to reason together They embrace talk as a decision procedure But of course thousands or millions of people cannot realistically talk to one another all at once When putting their theories into practice deliberative democrats therefore tend to focus on mini publics usually of a couple dozen to a couple hundred people In *Innovating Democracy* Robert Goodin surveys these new deliberative mechanisms asking how they work and what we can properly expect of them He concludes we should treat talk as discovery procedure rather than as a decision procedure Goodin goes on to show how to adapt our thinking about the familiar institutions of representative democracy to take full advantage of such deliberative inputs That involves rethinking who should get a say how we hold people accountable how we sequence deliberative moments and the roles of parties and legislatures in that

Throw Your Stuff Off the Plane Art Horn, 2017-11-25 A guide to making the leap from imposed accountability to personal commitment for both individuals and organizations Accountability we all want the people around us to be responsible reveal genuine commitment keep their word and stay away from blaming others But organizational systems that aim to institutionalize accountability don't quite go all the way People are people They have their own wants and needs their own psychological

tangles and they often don't particularly want to be held accountable let alone confront others who have let them down

Throw Your Stuff Off the Plane is here to help It reveals the missing ingredient organizations usually overlook personal responsibility It's an approach to self improvement for each reader centring on untangling the conflicting thoughts that block personal responsibility And it's a guide for every leader who wants to go all the way *The Politics of Urban Development* Clarence Nathan Stone, Heywood T. Sanders, 1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to be said about the policies and politics of urban development To supplement prevailing theories *The Politics of Urban Development* argues that the role of local actors in making development decisions merits closer study Whatever the structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference *California.
